Glaciers, Nature, Water, and Local Community in Mount Kenya Kazuharu Mizuno, Yuya Otani, 2022-03-18 This book describes the challenges for the natural environments and local communities in the future Among the high mountains of Africa only Kilimanjaro Mount Kenya and the Rwenzori Mountains are still capped with glaciers The retreating rate of these glaciers has accelerated and they are expected to disappear in the near future In the area around Mount Kenya the precipitation is generally low such that rainfall cannot stably supply water for farmlands and daily life It has been revealed that the glacial meltwater has produced springs at the foot of the mountain It is therefore important to characterize the condition of water sources near Mount Kenya for use by local people This book discusses the relationships between the actual state of the climate and glacier shrinkage around Mount Kenya the surrounding vegetation soil and water environments and the lives of the foothill region inhabitants confronting the glacier shrinkage This book is valuable in the contemporary age when the assurance of a sustainable relationship between nature and mankind is critical

Day-Care for Healthy Child Development and Wider Social and Economic Gain in Urban Areas in Low- and Middle Income Countries Helen Elsey, Patricia Kitsao-Wekulo, Robert C. Hughes, Margaret Nampijja, Paula Griffiths, Shagoofa Rakhshanda, George Evans Owino, 2024-06-26 Rapid urbanization in low and middle income countries LMICs has triggered a childcare crisis As families move to the city they leave behind extended family and traditional support networks parents and guardians particularly mothers are working long hours outside the home often in informal and unstable jobs In response to the increasing demand a range of informal private and NGO providers have sprung up to provide day and sometimes night care Governments are struggling to respond and the care for children in the early years frequently falls between ministries The combination of these factors in LMIC cities has left children from low income families with substandard childcare which poses a threat to their immediate and long term health and development

but what does this mean for these regions pastoralists and other livestock keepers and their livelihoods Will those who have occupied drylands over generations benefit from the developments as claimed or is this a new type of territorialisation exacerbating social inequality This book s detailed local studies of investments at various stages of development from Kenya Tanzania Somaliland Ethiopia explore for the first time how large land resource and infrastructure projects shape local politics and livelihoods Land and resources use based on ancestral precedence and communal practices and embedded regional systems of trade are unique to these areas yet these lands are now seen as the new frontier for development of national wealth By examining the ways in which large scale investments enmesh with local political and social relations the chapters show how even the most elaborate plans of financiers contractors and national governments come unstuck and are re made in the guise of not only states grand modernist visions but also those of herders and small town entrepreneurs in the pastoral drylands The contributors also demonstrate how and why large scale investments have advanced in a more piecemeal way as the challenges of implementation have mounted
