

How to write a critical review article

S A Hamed Hosseini

Lecturer, School of Humanities and Social Sciences, the University of Newcastle

Version 1.2 ©05/2014

A 'critical' literature review is supposed to 'critically examine' a rather solid literary body of arguments/ideas around a particular topic. The literary body of ideas around the topic (i.e. literature) may include theorizations, conceptualizations, and/or explanations based on empirical studies of the topic. Each body of ideas supports at least one thesis about the topic. The critical review can be structured through answering the following questions:

Critical Review Questions (CRQs):

Introduction:

1. What are the very core arguments thesis/theses developed in the literature around the topic? What are their findings (if the literature includes empirical research)? What theories are used or developed? How are the core concepts defined?
2. Where is the given literature located in its wider historical and intellectual/theoretical contexts? It is important not to consider the literature as an isolated body of arguments but rather to consider it in relation to other similar attempts to study the topic from different points of view.

For instance, if the topic is 'social class in the post-modern time', one body of ideas that you may like to focus on as your main theme can be the idea of meta-industrial class/labor as developed by eco-feminist theorist Ariel Salleh. The thesis is that the meta-industrial labor is a new social class that has the capacity to transform the capitalist relations due to some of its specific features. Historically, such a body of ideas around new classes has emerged in the context of post-Marxist, post cold war era as the result of failure of classical theories of class in explaining the recent changes in the class composition of modern societies. Here you need to explain how the idea of meta-industrial class can be related to and/or located in the wider context of recent theoretical attempts to theorize social classes in the post cold war (post-Marxist) era. You may briefly name a few other important theses with some overlaps and differences.

Discussion (Body):

3. To what extent are the arguments and the thesis embedded in them (as presented by the author(s) in the literature) supported by facts/evidence? How selective vs. inclusive are the authors in their approach to empirical evidence? Answering this question requires the reviewer to examine the given body of ideas or thesis in the literature in terms of its ability to back up the

A History of Scientific Journals Aileen Fyfe,Noah Moxham,Julie McDougall-Waters,Camilla Mørk Røstvik,2022-10-03 Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights

from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing. The editorial management, business practices, and financial difficulties of the *Philosophical Transactions* and its sibling *Proceedings* reveal the meaning and purpose of journals in a changing scientific community. At a time when we are surrounded by calls to reform the academic publishing system, it has never been more urgent that we understand its history.

Nursing Research and Statistics - E-Book Suresh Sharma, 2022-11-16. *Nursing Research and Statistics* fourth edition is precisely written as per the Indian Nursing Council revised syllabus for BSc nursing students. It may also serve as an introductory text for the postgraduate students and can also be helpful for general nursing and midwifery students and other health care professionals. The book is an excellent attempt towards introducing the students to the various research methodologies adopted in the field of nursing.
