to implement and work with it involved a considerable amount of experimentation This book showcases the current state of application and discusses how different countries have developed their own specific versions of the standard which organizations can use to certify their SR processes Comparative CSR and Sustainability Gabriel Donleavy, Carlos Noronha, 2022-12-30 This book breaks new ground by providing a structured and cohesive set of contributions on the actions developments problems and theories of corporate social responsibility CSR With new case studies from the UN s Least Developed Countries LDCs contributors in this book investigate how firms in Eastern and Western countries are responding to and making use of evolving CSR guidelines The book addresses the following questions is CSR simply greenwashing or an authentic commitment to responsible corporate citizenship Has globalization drawn CSR conduct in LDCs closer to that of industrialized countries Stakeholder theory actor network theory and a new orbital theory of accountability are applied to give coherence to the case studies Other chapters address greenwashing in reports the impact of CSR in socially stigmatized occupations an analysis on what responsibility precisely entails in CSR and the interface between law and CSR The book also considers the impact of COVID 19 on the hospitality industry and includes a contribution from Ukrainian scholars one written while their city of Kharkiv was under attack by Russian forces This book will be a useful reference to those interested in discussions on crises climate change and SDGs and realizing sustainable goals through CSR **Corporate Social Responsibility Report**, 1986 **The World Guide to CSR** Wayne Visser, Nick Tolhurst, 2017-09-08 The World Guide to CSR is the first book to provide comparable national profiles that describe the evolution and practice of Corporate Sustainability and Responsibility CSR for 58 countries and 5 global regions Each regional and national profile includes key information about the relevant CSR history country specific issues trends research and leading organizations The purpose of the book is to give CSR professionals including managers consultants academics and NGOs focusing on the social environmental and ethical responsibilities of business a quick reference guide to CSR in different regional and national contexts The need for the book is premised on the fact that CSR professionals and researchers more often than not have a multinational remit and are required to benchmark performance internationally but find that country specific CSR information is ad hoc limited or non existent Even where national CSR research exists it is often hidden in academic journals that practitioners cannot access or do not have the time or inclination to read The book is an edited volume with expert contributors from around the world all of whom have been screened and selected on the basis of their qualifications and experience in CSR Each regional country profile includes the following subsections CSR in context Priority issues Trends Legislation and codes Organizations Case studies Educational institutions References This unique resource will be an essential acquisition for all organisations who need to benchmark their CSR strategies throughout different regions and cultures and want the best possible intelligence on the key issues and concerns relating to corporate social responsibility in all of the markets in which they operate *The A to Z of Corporate Social Responsibility* Wayne Visser, Dirk Matten, Manfred

Being socially responsible on the part of corporate entities is now no longer an option it is part of their normal business obligations to all their stakeholders regardless of whether these are primary or secondary stakeholders. Modern societies around the world now expect corporate entities of all shapes and forms to be socially responsible in whatever they do. The Global Practices of Corporate Social Responsibility is a first attempt at bringing together in one book experts' accounts of how corporate entities in twenty independent nations around the world are dealing with the issue of CSR. The world today faces diverse social problems. These become apparent as

one moves from one country to the next interestingly society now expects corporations to help in finding solutions to these problems The problem of global warming affects us all modern corporations can no longer continue to assume that the problem will go away if nothing is done by them We can all make a little difference by our actions CSR Reporting and the Belt and Road Initiative Ruopiao Zhang, Carlos Noronha, Jieqi Guan, 2023-06-23 The Belt and Road Initiative BRI is a major development strategy launched by the Chinese government with the goal of fostering economic cooperation among countries along the proposed routes The BRI marks a new era in which multinational enterprises MNEs from developing countries are beginning to take primary responsibility for driving global flows of outward foreign direct investment OFDI Among hotly debated topics on how the BRI is reshaping the global competitive landscape corporate social responsibility CSR reporting practices of Chinese MNEs along the Belt and Road are noteworthy but relatively less discussed This book investigates how do Chinese MNEs engage with define and implement CSR under such an enormous cooperative initiative through analyzing their CSR reporting practices in the BRI host countries Besides this opportunities and challenges of the BRI investments for sustainable development in host countries are examined The book provides critical insights into the current institutional architecture for CSR reporting to promote sustainable development It also highlights the importance of stakeholders capacities to sustain enact and execute strict CSR disclosure laws and regulations The findings mark important implications particularly in view of growing concerns about international reputational damage of unsustainable OFDI The book is suitable for researchers undergraduate and postgraduate students in the fields of CSR sustainability development accounting and international business as well as others who are keen on the latest development of the BRI in relation to other developing and least developed countries *Corporate Social Responsibility* David Chandler, 2014-11-15 The goal of this project is to detail the core defining principles of strategic CSR that differentiate it as a concept from the rest of the CSR sustainability business ethics field It is designed to be a provocative piece but one that solidifies the intellectual framework around an emerging concept strategic CSR The foundation for these principles comes from my perspective as a management professor within the business school As such it is a pragmatic philosophy oriented around stakeholder theory that is designed to persuade business leaders who are skeptical of existing definitions and organizing principles of CSR sustainability or business ethics It is also designed to stimulate thought within the community of intellectuals and business school administrators committed to these issues but who approach them from more traditional perspectives Ultimately therefore the purpose of the strategic CSR concept and this book is radical it aims to redefine both business education and business practice By building a theory that defines CSR as core to business operations and value creation as opposed to peripheral practices that can be marginalized within the firm these defining principles become applicable across the range of operational functions As such they redefine how businesses approach these functions in practice but also redefine how these subjects should be taught in business schools *Restatement of CSR Reports* Matt Pinnuck, 2019 We provide the first direct analysis of the reliability of

the quantitative information disclosed in Corporate Social Responsibility CSR reports We examine the frequency magnitude and determinants of CSR report restatements for the Global Fortune 250 G250 from 2006 to 2013 During this period 39% of G250 CSR reports were restated with a monotonic increase across time from 29% in 2006 to 53% in 2013 The median magnitude of line item restatement is 10% with a bias toward overstatement In our exploration of determinants and economic incentives associated with CSR report restatements we find that restatement frequency is positively associated with firm environmental and social complexity and that restatements occur more frequently in firms that have reported a high level of social performance and have environmental targets We also find that frequency of restatement is positively associated with firms that reside in strong law countries and have their CSR reports audited Our analysis of reporting bias indicates a negative association between adoption of GRI reporting guidelines and the likelihood of an overstatement We also find a positive association between having the CSR report audited and the likelihood of overstatements Together our results indicate that CSR information could be unreliable and firms that face pressure to perform well have more restatements However use of measurement guidelines helps restrict managers disclosure choices and thus prevents opportunistic choice of measurement methods Auditors also appear to invest more time and effort to reduce over rather than understatement of performance
