A balance of theory, worked examples, and extended examples, practice problems, and real-world applications combined with over 350 new homework problems for the fourth edition and robust media offerings renders the fourth edition the most comprehensive and student-friendly approach to linear circuit analysis. This edition adds the Design a Problem feature which helps students develop their design skills by having the student develop the question as well as the solution. There are over 100 Design a Problem exercises integrated into the problem sets in the book. Alexander Sadiku also offers you the convenience of ARIS, the text-specific web site which allows you to assign homework online or create printed homework sets and solutions to your students.
