[Harnessing Cloud Computing to Redefine Banking IT Operations for Scalable and Secure Systems](#) Sapana Garud,2025-02-18 The growth of high speed networks and computing power is making possible to process different banking services or applications in microseconds undreamed of in the past These rapid explosions of technology are changing the banking industries from paper and branch banks to digitized and networked banking services Wakeham 2010 Delivering banking services on this networked environment are more convenient and effective than ever before Expanding the geographical coverage of digitized and networked banking services are the mainstreams for banks to deliver QoS to customers NBE 2012 In developing countries the cost of expanding the geographical coverage of digitized and networked banking services to customers would be difficult for a single bank In this environment

banks would start to collaborate to pool non differentiated activities using private cloud computing within a closed group of banks in a similar way to telecommunication sharing network infrastructure Sardet 2012 These bundling could provide shared services that interact with customers in more engaging ways while simultaneously freeing banks from the burden of routine transactions Thus when the transaction volumes decline this collaboration could enables banks to stop duplicating investment industrialize their security processes for economies of scale gain new service options and have immediate access to the latest apps These collaborative private clouds could even be hybrid cloud powered by a third party increasing the benefits of cost and flexibility Sardet 2012
