Taste: Media and Interior Design Karin Tehve, 2023-06-26 This book traces and explores the evolution of taste from a design perspective what it is how it works and what it does. Karin Tehve examines taste primarily through its recursive relationship to media. This ongoing process changes the relationship between designers and the public and our understanding of the relationship of individuals to their social contexts. Through an analysis of taste design is understood to be an active constituent of social life not as autonomous from it. This book reclaims a term long dismissed from interior design and unveils taste's role as a powerful social and political agent within systems of aesthetics affecting both its producers and consumers. Each chapter discusses a taste concept or definition analyzes its reciprocal relationship with media and explores its implications for interior design. Illustrated with 70 images taste's relationship to media is viewed through a variety of different lenses including books photography magazines internet social media and algorithms. Written primarily for students and scholars of interior design and related design fields this book will be a helpful resource for all those interested in the question of taste and is an invitation to produce and consume all media critically.

Approaching Regeneration of the Built Environment Saimir Shtylla, Hamid Rabiei, 2025-06-02 This book approaches three important aspects related with urban regeneration such as research innovation and challenges. In light of its growing interdisciplinarity the selected contributions extend the debate to the importance of the cooperation between various disciplines attention to the latest design and technological trends as well major inclusivity of citizens for a correct decision making process leading afterwards into successful development test and implementation of innovative solutions. An important focus will be set on the important role innovations play in the preservation and management of heritage sites in response to the climate and urban challenges encountered. Also this contribution aims to transmit the importance of local interventions in

the achievement of urban regeneration as an impulse for the achievement of the common global climate goals in the years ahead *Structures and Architecture. A Viable Urban Perspective?* Marie Frier Hvejsel, Paulo J.S. Cruz, 2022-07-08

Structures and Architecture A Viable Urban Perspective contains extended abstracts of the research papers and prototype submissions presented at the Fifth International Conference on Structures and Architecture ICOSA2022 Aalborg Denmark 6-8 July 2022. The book 578 pages also includes a USB with the full texts of the papers 1448 pages. The contributions on creative and scientific aspects in the conception and construction of structures as architecture and on the role of advanced digital industrial and craft based technologies in this matter represent a critical blend of scientific technical and practical novelties in both fields. Hence as part of the proceedings series *Structures and Architecture* the volume adds to a continuous exploration and development of the synergetic potentials of the fields of Structures and Architecture. With each volume further challenging the conditions problems and potentials related to the art practice and theory of teaching researching designing and building structures as vehicles towards a viable architecture of the urban environment. The volumes of the series appear once every three years in tandem with the conferences organized by the International Association of Structures and Architecture and are intended for a global readership of researchers practitioners and students including architects structural and construction engineers builders and building consultants constructors material suppliers planners urban designers anthropologists economists sociologists artists product manufacturers and other professionals involved in the design and realization of architectural structural and infrastructural projects.
