1990 level but they comprise less than one quarter of the world population. On the other hand 81 percent of the countries with more than 60 percent of the world population will not be able to achieve this goal until 2015. Every day more than 30 000 children die of preventable diseases. It is dramatic that many countries that will not achieve this goal are among the world's poorest i.e. the least developed countries.
