Solutions Manual for Introduction to Data Mining and Constraint Programming

Christian Bessiere, Luc De Raedt, Lars Kotthoff, Siegfried Nijssen, Barry O'Sullivan, Dino Pedreschi, 2016-12-01 A successful integration of constraint programming and data mining has the potential to lead to a new ICT paradigm with far reaching implications. It could change the face of data mining and machine learning as well as constraint programming technology. It would not only allow one to use data mining techniques in constraint programming to identify and update constraints and optimization criteria but also to employ constraints and criteria in data mining and machine learning in order to discover models compatible with prior knowledge. This book reports on some key results obtained on this integrated and cross disciplinary approach within the European FP7 FET Open project no 284715 on Inductive Constraint Programming and a number of associated workshops and Dagstuhl seminars. The book is structured in five parts: background learning to model learning to solve constraint programming for data mining and showcases.

ECAI 2006 Silvia Coradeschi, Anna Perini, Paolo Traverso, 2006-08-15 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence. During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world. Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication. In comparison with ECAI 2004 there is a strong increase in the relative number of submissions from Distributed AI, Agents and Cognitive Modelling. Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 06. One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS.
