Exercise and Chronic Disease Yanan Zhao, Huating Li, Yanping Duan, Huanguang Jia, 2024-02-21 Chronic disease refers to those health problems continuing or reoccurring for a long time In addition to the commonly discussed chronic disease chronic diseases in this Research Topic include mental diseases substance abuse visual impairment developmental disorders advancing age related degradations and other chronic health problems Unlike acute illnesses chronic diseases are not easily diagnosed before clinical symptoms and are hard to manage Early prevention by identifying the potential risk factors and applying the proper interventions would have tremendous meaning to chronic disease management and treatment To date exercise has been acknowledged as an active and efficient way to prevent and treat a variety of chronic diseases However disputes exist in the current evidence including but not limited to the lack of rationales in exercise program design improper implementation of intervention without following basic training principles and conflicting opinions towards the optimal exercise prescriptions for different chronic conditions to name a few Some of these questions may stay hard to answer but we look forward to new perspectives advanced methods measures innovative findings and exploratory solutions to understand exercise therapy in chronic disease management and health promotion

Wood & Wood Products, 1989 [Our Threatened Climate](#) W. Bach, 1984 In this book the author has succeeded in presenting the many facets of the global problems and hazards for our climate and their interdisciplinary aspects as well as making these understandable for the non specialist In doing this the author has not restricted himself to an analysis of the difficult problems but has indicated the necessity and the possibilities for rational solutions The book therefore can be a valuable decision aid for all those who directly or indirectly are in positions of responsibility at various levels of administration or in industry end business Well timed precautionary measures against a global deterioration of climate are not only necessary for reasons of environmental protection They are also an economical and political necessity The measures include the reduction of the combustion of fossil fuels a more rational energy utilization as well as the establishment of a global equilibrium between forest loss and reforestation The Federal German Government takes these potential anthropogenic climate changes very seriously In order to obtain better scientific information the Federal Government has initiated an interdisciplinary national Climate Programme At the same time

the Federal Republic of Germany supports the relevant activities within the frame of international cooperation
