Goal Process Ongoing Improvement:

The Goal Eliyahu M. Goldratt, Jeff Cox, 2016-08-12 Alex Rogo is a harried plant manager working ever more desperately to try and improve performance. His factory is rapidly heading for disaster. So is his marriage. He has ninety days to save his plant or it will be closed by corporate HQ with hundreds of job losses. It takes a chance meeting with a colleague from student days, Jonah, to help him break out of conventional ways of thinking to see what needs to be done. Described by *Fortune* as a guru to industry and by *Businessweek* as a genius, Eliyahu M. Goldratt was an internationally recognized leader in the development of new business management concepts and systems. This 20th anniversary edition includes a series of detailed case study interviews by David Whitford, Editor at Large, *Fortune* Small Business, which explore how organizations around the world have been transformed by Eli Goldratt's ideas. The story of Alex's fight to save his plant contains a serious message for all managers in industry and explains the ideas which underline the Theory of Constraints (TOC) developed by Eli Goldratt. Written in a fast-paced thriller style, *The Goal* is the gripping novel which is transforming management thinking throughout the Western world. It is a book to recommend to your friends in industry, even to your bosses, but not to your competitors.

Business Process Management Jörg Desel, Barbara Pernici, Mathias Weske, 2004-06-04. In recent years, the management of business processes has emerged as one of the major developments to ease the understanding of communication about and evolution of process-oriented information systems in a variety of application domains. Based on explicit representations of business processes, process stakeholders can communicate about process structure, content, and possible improvements. Formal analysis, verification, and simulation techniques have the potential to show deficits and to effectively lead to better and more executable processes. Process mining facilitates the discovery of process specifications from process logs that are readily available in many organizations. This volume of Springer's Lecture Notes in Computer Science contains the papers presented at the 2nd International Conference on Business Process Management (BPM 2004) which took place in Potsdam, Germany, in June 2004. From more than 70 submissions, BPM 2004 received 19 high-quality research papers, which were selected. BPM 2004 is part of a conference series that

provides a forum for researchers and practitioners in all aspects of business process management In June 2003 the 1st International Conference on Business Process Management took place in Eindhoven The Netherlands Its proceedings were published as Volume 2678 of Lecture Notes in Computer Science by Springer Verlag A previous volume LNCS1806 on Business Process Management was based on four events devoted to this topic
