Basic Wax Modeling Hiroshi Tsuyuki, 2019 Mr Hiroshi Tsuyuki the Japanese authority on Jewelry Wax Modeling uses an innovative approach to teaching the technique of wax modeling Often a process is easier shown than described in so many words This book was conceived through the author s teaching experience more photos and sketches and less text resulting in less over the shoulder supervision By introducing new techniques in each project his students were able to progress more rapidly towards independence in design concepts While preparing a model for casting and the actual casting process are adequately explained in most casting books very little space is devoted to the design and creation of wax models Mr Tsuyuki presents 11 basic projects in this book each one designed to teach the use of certain tools and types of waxes in a progressive manner as one s skills improve Each step of every project is accompanied by a photo and text and in some cases supplementary sketches and notes are provided to clarify those particular processes Paying careful attention to the photos noting the demonstrator s hand position and the type of tool being used eliminates any confusion which may result from the text After each basic model is completed the author offers a number of sketches suggesting design possibilities using the techniques learned in the construction of the basic model Mr Tsyuki states that by conscientiously completing each project the student should be well on the way to becoming a designer modeler This book is 112 pages and has 283 photos and illustrations
