Global Trend Young Adult Life Skills:

People, Planet, and Progress Beyond 2015, 2016-12-15 Second in the series of TERI's annual flagship publication on global sustainable development *People Planet and Progress Beyond 2015* examines six critical issues of the Planet: climate change, ozone layer depletion, loss of biodiversity, desertification, unsustainable use of natural resources, and environmental pollution; and six crucial issues of the People: food security and safety, health and well-being, education and learning, sustainable habitat, energy for all, and social justice and equity. It reviews the progress made by various regions and countries of the world on each of these issues and analyses the challenges and opportunities ahead, particularly in the contexts of post-2015 global development agendas ushered by the Paris Climate Agreement, UN Sustainable Development Goals, and Sendai Framework for Disaster Risk Reduction. The analysis is supported by primary data from authentic sources on a wide range of indicators that make the volume an invaluable resource material on contemporary discourses on global development.

The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia-Pacific region. The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region. In so doing, the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues. Moreover, since new problems and issues are constantly arising, the articles in the Handbook also indicate the likely directions of future developments. The different articles within the Handbook seek to conceptualize the problems in each specific content area under review, provide an integration of the research conducted within that area, the theoretical basis of the research, the practical implications of the research, and the contribution of the research towards the resolution of the problems identified. Thus, the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with

reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

Globalization, International Education Policy and Local Policy Formation Carolyn A. Brown, 2014-10-13 This edited volume focuses on how international education policy set by international policymakers and donors influences local education policy in developing countries The book s primary purpose is to give voice to scholars from developing countries and regions around the world by inviting them to explore how the international policy invariably linked to international aid influences education policy formation and implementation in their country or region and how this influence does or does not meet the local cultural social economic and political needs A relatively recent and small body of research and commentary supports a discourse that

questions how well international education policy mandates such as Education For All serve the needs of developing countries The intent of this book is to advance this discourse by giving voice to local scholars who observe and study the donor process The book will be divided into two sections the first section will set the stage for the discussions in the second section by providing theoretical and historical context for international education policy As a framework for understanding the book adopts the position that international policy does not have either the ability or the intent to serve the widely diverse needs of development around the world International education policy has been formed historically by wealthy nations and agencies dominated by Western theoretical paradigms In recent years donor countries have made an effort to collaborate with developing countries in developing international education policy goals however this collaboration has been limited Following establishment of the context of international education policy section II of the book provides a forum for scholars from around the world to openly discuss and critique the impact of international policy on education in their country or region

Reaching the Marginalized ,2010-01-01 Children at risk of marginalization in education are found in all societies At first glance The lives of these children may appear poles apart The daily experiences of slum dwellers in Kenya ethnic minority children in Viet Nam and a Roma child in Hungary are very different What they have in common are missed opportunities to develop their potential realize their hopes and build a better future through education A decade has passed since world leaders adopted the Education for All goals While progress has been made millions of children are still missing out on their right to education Reaching the marginalized identifies some of the root causes of disadvantage both within education and beyond and provides examples of targeted policies and practices that successfully combat exclusion Set against the backdrop of the global economic crisis The Report calls for a renewed financing commitment by aid donors and recipient governments alike to meet the Education for All goals by 2015 This is the eighth edition of the annual EFA Global Monitoring Report The Report includes statistical indicators on all levels of education in more than 200 countries and territories
