Engineering Research Centres ,1995 Science and Earth History Arthur N. Strahler,1999-11-01 In this
comprehensive treatment of the ongoing conflict between creationists and evolutionary scientists well known
geomorphologist Arthur Strahler carefully examines creationists claims of scientific evidence for the six day divine creation
of the universe followed by the catastrophic flood of Noah as claimed in Genesis The creationists arguments are examined
and evaluated against the findings of mainstream science in the fields of cosmology astronomy geophysics geology
paleontology and evolutionary biology Updated with a new preface and responses to recent attacks on evolutionary theory
Science and Earth History can serve as both a popular overview of earth history and as a scholarly anecdote to the fictions of
creationism once again finding their way into classrooms and universities Strahler illuminates the controversy by reviewing
the philosophy methodology and sociology of empirical science as contrasted with the belief systems of religion and
pseudoscience The author also includes lucid criteria for distinguishing science from pseudoscience and reviews the great
discoveries and developments in science that point to the evolution of life over the earth s three billion year history J.
