IoT, Big Data and AI for Improving Quality of Everyday Life: Present and Future Challenges Pradeep Kumar Singh,Sławomir T. Wierzchoń,Wiesław Pawłowski,Arpan Kumar Kar,Yugal Kumar,2023-08-23 This book focuses mainly on the usages of three key technologies IoT big data and AI for various day to day applications Further it explores the possibilities of future research based on the usages of latest information systems This book explores the current research and challenges to be faced by different researchers for building intelligent information solutions using key technologies IoT big data and AI in improving quality of lives in smart cities and explores the limitations and capabilities of these three key computing technologies The book is organized into three major parts each part includes chapters exploring a specific topic and there are PART 1 IoT for Real World Solutions ii Part 2 Big Data And Cloud Computing for Innovative Solutions For Day to Day Lives and iii Part 3 Artificial Intelligence for Everyday Lives This book may be useful to the scientists scholars and researchers who are working in the field of computer science and engineering and communication engineering along with the students in these subjects who are working or willing to work on IoT big data and AI technologies for improving quality of everyday life Specialists as well as student readers find the book chapters encouraging and helpful IoT data science cloud and AI all are the undergraduate UG bachelor subjects Use of these three key technologies for building new applications for better world is helpful for UG and postgraduate PG MS Programmes students as an elective and core course This book may also be very useful for the Ph D research scholars during their course work and may be used as an instrument to identify the different challenges associated with information systems *Proceedings of the International Conference on AI Research* Carlos Goncalves,Jose Carlos Dias Rouco, **Towards HRI of Everyday Life** Karolina Zawieska,Mohammad Obaid ,Wafa Johal,Jessica Sorenson,Catharina Vesterager Smedegaard,Glenda Hannibal,2025-10-03 Presently it is often assumed that at least in principle robots and social robots in particular have the potential to increase human well being across a wide range of sectors and application areas At the same time efforts to introduce such systems into our everyday environments have had only limited success and it is yet to be seen whether the impact of social robots on our daily lives professional and private will actually be beneficial Therefore there is a need to systematically address and study the long term use and presence of social robots in everyday environments where humans not only interact with robots but also have them integrated into the totality of their lived experiences in everyday life One of the main ways to investigate human engagement with social robots in everyday environments is through HRI studies conducted in the wild While such an approach has certainly been instrumental to and is increasingly used in HRI research we propose here to further expand the underlying theoretical and methodological frameworks to address the notion of everyday life The latter is viewed here as a useful concept and an umbrella term that allows us to address not only specific application domains for robots but also the continuity and totality of human lived experiences that emerge through long term engagement with social robots in everyday life contexts Placing social robots in

everyday settings has often been an explicit goal for robot development however the notion of everyday life has yet to be systematically analysed and addressed in this context Therefore this Research Topic aims to bring together a wide range of disciplinary and interdisciplinary contributions to further develop the HRI domain **Effects of Electromagnetic Radiation on Living Beings** Felix A. Farret,2025-05-06 The objective of this book is to show in detail how electromagnetic waves existing in the environment can affect the electrochemical currents present in the brains and bodies of living beings that serve to communicate with their internal organs as well as with other living beings These electromagnetic waves are distributed intensively by current means of communication television cell phones radar medical equipment electrical machines electrical networks etc and by the stars in the Universe Such waves can affect in one way or another the electrochemical currents of living beings which seem to be currently interpreted as sensations hypnosis telepathy intuition spells mediumship visions and precognition as well as other less widespread forms such as telekinesis radiesthesia clairvoyance precognition and teleportation Several world famous examples of these possibilities are illustrated in the final chapter of this book Key Features 14 examples of diverse international case studies included Challenges conventional ways of thinking by exploring the intersection of electromagnetic waves and extrasensory perception Equips readers with insights into the various effects of electromagnetic waves in daily life which promotes awareness of their environment and its different influences and how they impact people Provides an engineering framework for understanding extrasensory beliefs and aims to explain the concept of historical brain believing in a better manner Revealing Leslie John,2026-02-24 A fascinating look into why people reveal what they do about themselves and how we can all communicate better with others Arthur C Brooks bestselling author of From Strength to Strength A groundbreaking book on the surprising potential of revealing more of ourselves to others from a celebrated Harvard Business School professor and expert on the psychology of personal disclosure decisions We all know the feeling that gut wrenching post conversation replay cringing at how much we just revealed We live in fear of saying too much so we keep our mouths shut guard our emotions and lock away our most personal thoughts But what if we ve been worrying about the wrong thing A growing body of research shows we vastly underestimate the value of sharing more than we think we should with our spouses friends colleagues and even strangers Drawing on over a decade of research and real life stories behavioral scientist Leslie John explores why we hesitate to open up when sharing really does backfire and how to strike a balance between too much and too little Learning to be more vulnerable and open at work and at home can unlock some of life s richest rewards deeper friendships stronger professional relationships greater well being and yes even love Revealing is a road map for making smarter bolder and ultimately more satisfying decisions about just how much you want to share and why **Network Nature** Richard Coyne,2018-04-05 How do people avoid the stresses of the digital age Urban dwellers must now turn to nature to recover restore and rebalance after the stresses brought on by relentless digital connectivity It is easy to task nature as the cure with technology as the ailment

In Network Nature Richard Coyne challenges the definitions of both the natural and the artificial that support this time worn narrative of nature s benefits In the process he attacks the counter claim that nature must succumb to the sovereignty of digital data Covering a spectrum of issues and concepts from big data and biohacking to animality numinous spaces and the post digital he draws on the rich field of semiotics as applied to natural systems and human communication to enhance our understanding of place landscape and architecture in a digital world   Psychology in Everyday Life David G.
