INTRODUCTION

As stated by an African proverb, it takes a village in order to raise a kid. That statement only proves a certain common belief that people really thrive in an environment where they are comfortable, and where they feel mentally, spiritually, emotionally, and socially supported. Therefore, it only becomes natural to consider that one of the most vital tasks as an individual human being is to provide support and care for others. While giving this support, it is very important that we also do so while making sure that we keep their best interest in mind. This means that we need to show grace wherever and whenever possible, and at the same time, introducing personal biases as needed.

WHY STUDY THE FIELD OF ANTHROPOLOGY

Studying the field of anthropology is extremely important as a whole since from the very first time man stepped on this planet, he has already faced a lot of challenges to his survival. As such, he has developed certain habits which have helped him to endure several hardships. He has made for himself shelters which provide protection from harsh elements. He has also created certain rituals and traditions in order to celebrate his personal victories, fortune and relationships. All of these kinds of experience and knowledge were clearly passed from one person to another, thus making sure of the survival, as well as in lessening the burden that needs to be carried by the future generation.
