## Sap Hybris Marketing Architecture Overview:

**Process Innovation: Enabling Change by Technology** Daniel R. A. Schallmo, Leo Brecht, Bujar Ramosaj, 2018-05-10  
This management manual and textbook introduces the theoretical basics of process management and provides a procedural model for process innovation. The procedural model makes it possible to develop customer-oriented processes in a structured manner and to design them in order to meet changing requirements. This textbook has been recommended and developed for university courses in Germany, Austria, and Switzerland. This book enables readers to understand and apply the seven-phase procedural model for process innovation in order to design and implement innovative processes. Exercises and review questions test understanding of the theoretically acquired knowledge.

**B2B Marketing Guidebook - Vol. 1** Uwe Seebacher, 2025-07-15  
In the age of Industry 5.0, predictive intelligence and accelerated digital transformation, B2B marketing has become the strategic engine of growth and innovation. This first volume of the second significantly updated edition of B2B Marketing brings together over 20 international experts to redefine modern marketing across strategy, systems, and structure. Covering topics such as marketing maturity, MarTech, automation, branding, and agile leadership, this volume offers actionable frameworks, forward-looking insights, and real-world case studies from leading organizations like Fynest, Fujitsu, Hapag-Lloyd, and Predictores. Readers will gain a clear understanding of the B2B Marketing Maturity Model, strategic perspectives on predictive intelligence, and best practices for marketing automation. Essential reading for CMOs, business leaders, marketing professionals, consultants, and academics, this book is a strategic blueprint for the next decade of B2B marketing. The transformation starts here.

*Artificial Intelligence for Business Analytics* Felix Weber, 2023-03-01  
While methods of artificial intelligence (AI) were until a few years ago exclusively a topic of scientific discussions, today they are increasingly finding their way into products of everyday life. At the same time, the amount of data produced and available is growing due to increasing digitalization, the integration of digital measurement and control systems, and automatic exchange between devices (Internet of Things). In the future, the use of business intelligence (BI) and a look into the past will no longer be sufficient for most companies. Instead, business analytics, i.e., predictive and prescriptive analyses and automated decisions, will be needed to stay competitive in the future. The use of growing amounts of data is a significant challenge, and one of the most important areas of data analysis is represented by artificial intelligence methods. This book provides a concise introduction to the essential aspects of using artificial intelligence methods for business analytics, presents machine learning and the most important algorithms in a comprehensible form using the business analytics technology framework, and shows application scenarios from various industries. In addition, it provides the Business Analytics Model for Artificial Intelligence, a reference procedure model for structuring BA and AI projects in the company. This book is a translation of the original German 1st edition *Künstliche Intelligenz für Business Analytics* by Felix Weber, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature, in 2020. The translation was done with the help of artificial intelligence machine translation by the service

DeepL.com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors **B2B Marketing** Uwe G.
