The Next Business Model 2026 series, published by The Innovation Lab, a business trend analysis and business model consulting group, was designed specifically to address this need. This series was written based on NextBM200, a proprietary platform featuring vast data on over 5,000 business models across 25 industries. This book tracks how the macro changes of 2026 are branching out into specific business forms at the ground level of each industry. Beyond fundamental statements like "AI is rising" or "Hyper-personalization is important," readers can use this book to identify specific revenue models and service structures currently operating in the market. Each volume presents a detailed analysis of promising business models worth benchmarking or adopting immediately alongside the latest industry trend data. For those who need practical references that can be applied directly to next year's business plan rather than abstract futurology, this series will serve as the most reliable database.
