Test Result and Interview Guide

The Spoken Language Skills (Portuguese - Brazilian) assessment measures various aspects of a candidate's ability to listen and speak with others in their native language. A variety of different response types are used. Some measure the ability to understand simple questions directly, others ask for a more detailed, free-form response. Other measures sample interactions, such as creating a plan or explaining a plan, whereas the purpose of the assessment is to evaluate whether the candidate can do so effectively with individuals in their native language, and their ability to conduct a positive, relationship-building conversation. English versions of this test also include a full analysis of the way a candidate speaks if performed by others.
