Improvising Theory Allaine Cerwonka, Liisa H. Malkki, 2008-11-15 Scholars have long recognized that ethnographic method is bound up with the construction of theory in ways that are difficult to teach The reason Allaine Cerwonka and Liisa H Malkki argue is that ethnographic theorization is essentially improvisatory in nature conducted in real time and in necessarily unpredictable social situations In a unique account of and critical reflection on the process of theoretical improvisation in ethnographic research they demonstrate how both objects of analysis and our ways of knowing and explaining them are created and discovered in the give and take of real life in all its unpredictability and immediacy Improvising Theory centers on the year long correspondence between Cerwonka then a graduate student in political science conducting research in Australia and her anthropologist mentor Malkki Through regular e mail exchanges Malkki attempted to teach Cerwonka then new to the discipline the basic tools and subtle intuition needed for anthropological fieldwork The result is a strikingly original dissection of the processual ethics and politics of method in ethnography *AAOHN Journal*, 1986 *Education Management, Education Theory and Education Application* Yuanzhi Wang, 2011-10-09 This volume includes extended and revised versions of a set of selected papers from the 2011 2nd International Conference on Education and Educational Technology EET 2011 held in Chengdu China October 1 2 2011 The mission of EET 2011 Volume 2 is to provide a forum for researchers educators engineers and government officials involved in the general areas of education management education theory and education application to disseminate their latest research results and exchange views on the future research directions of these fields 133 related topic papers were selected into this volume All the papers were reviewed by 2 program committee members and selected by the volume editor Prof Yuanzhi Wang from Intelligent Information Technology Application Research Association Hong Kong The conference will bring together leading researchers engineers and scientists in the domain of interest We hope every participant can have a good opportunity to exchange their research ideas and results and to discuss the state of the art in the areas of the education management education theory and education application
