COURSE DESCRIPTION

This course provides an introduction to the principles of historical linguistics. We will examine the concepts of linguistic reconstruction and language change through a problem-solving approach.

Topics to be addressed include: (i) genetic relationship; (ii) sound change and the Comparative Method; (iii) language contact and borrowing; (iv) subgrouping.

Data will be drawn from a variety of languages, with a focus on the languages of the Austronesian language family.

TEACHING METHODS

This course covers major topics in historical linguistics through a series of readings, lectures, discussions, and 'hands-on' experience with comparative analysis.

Syllabus Comparative Historical Linguistics:

101 Problems and Solutions in Historical Linguistics Robert Blust, 2018-03-07 This workbook guides students through 12 problems on the establishment of genetic relationship among languages 24 problems on sound change 35 problems on phonological reconstruction 10 problems on internal reconstruction and 20 problems on subgrouping Each section begins with an introduction to the principles of historical linguistics as applied to the topic in hand The problems come next ordered by level of difficulty beginning intermediate advanced The Solutions section at the end of the book provides answers The workbook is intended to be a companion piece to any textbook on historical linguistics providing data based instruction on the basic principles of the field and illustrating theory in a practical way Key Features A clear structure for each section combining an overview of the topic with progressively difficult problems to work through Covers a wide range of problem types using examples from a wide range of languages including Austronesian languages Provides explicit solutions to all problems without the need to resort to a separate answer book or teacher s manual Groups the problems by level of difficulty with realistic and holistic expectations for solutions

Historical and Comparative Linguistics Raimo Anttila, 1989-01-01 In any course of historical and comparative linguistics there will be students of different language backgrounds different levels of linguistic training and different theoretical orientation This textbook attempts to mitigate the problems raised by this heterogeneity in a number of ways Since it is impossible to treat the language or language family of special interest to every student the focus of this book is on English in particular and Indo European languages in general with Finnish and its closely related languages for contrast The tenets of different schools of linguistics and the controversies among them are treated eclectically and objectively the examination of language itself plays the leading role in our efforts to ascertain the comparative value of competing theories This revised edition 1989 of a standard work for comparative linguists offers an added introduction dealing mainly with a semiotic basis of change a final chapter on aspects of explanation particularly in historical and human disciplines and added sections on comparative syntax and on the semiotic status of the comparative method

Linguistic Reconstruction Anthony Fox, 1995 How and why are languages constantly changing Historical linguistics seeks to find out by going beyond the history of individual languages to discover the general principles which underlie language change But our evidence is severely limited Most of the world s languages are still unwritten and even in areas with long written traditions such as Europe and the Near East documentary evidence stretches only a little way back along the path of the historical development of languages How then can we uncover our long linguistic prehistory and what can it tell us about language change This new textbook is an accessible general guide for students with an elementary knowledge of linguistics to the methods and theoretical bases of linguistic reconstruction and of newer less well established principles such as the application of linguistic universals and language typology and quantitative techniques Finally he reviews the principles for establishing language relationships and for uncovering information about the homelands and
