

## ELEMENTS OF A GRID

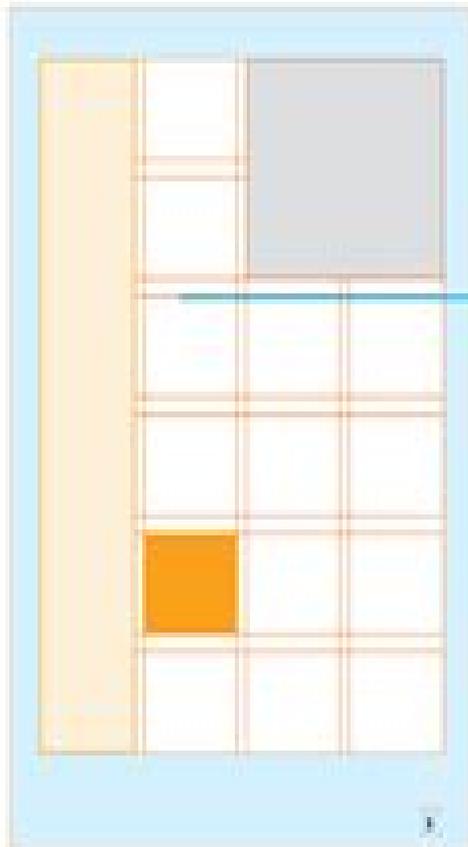

### 1. Know the Components

The main components of a grid are margins, columns, columns, headings, gutters, lines, and baselines. Starting with a page that is four pages wide and four pages high, let's see how you might use these elements to create a grid.

**MARGINS** are vertical columns that define the space between the text and the edges of the page. The width and number of margins on a page or across the entire document are determined by the content.

**HEADINGS** are individual elements, typically, centered above a heading, subheading, or section of text. Containing content can include images and icons of varying sizes.

**HEADERS** are header areas. They represent the amount of space between the top and the page content. Headers can also house secondary information, such as dates and captions.

**MATHS, GUTTERS** are groups of columns or rows that can be used to specify space for type, images, or other elements.

**FLYLINES** are elements that break space into horizontal bands for what text, images are created for each page and elements to guide a reader across a page.

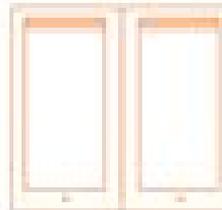

**MARGINS** are the space between the text and the edges of the page. The width and number of margins on a page or across the entire document are determined by the content.

## BASIC GRID DIAGRAMS

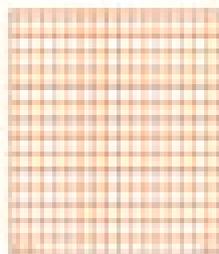

### 2. Learn the Basic Structures

Although the diagrams below show common structures, there are additional variations on the basic configurations. The modifications guide of margins and lines also extend beyond these columns to the rest of the page.

**1 COLUMN GRID** is a primary used for continuous reading text such as novels, reports, or books. The block of text is the main feature on the page, leaving a blank space.

**2 COLUMN GRID** are used for controlling the flow of content. Alternative use is newspaper, columns, right, and left. The columns are used to control the structure of the content.

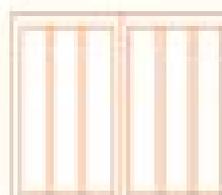

**2 TWO-COLUMN GRID** can be used to control a set amount of text within a specific column. A multi-column grid can be created with columns of equal or unequal width, or text placed in either the left or right side. The main content is usually the width of the entire column.

**MULTICOLUMN GRID** focus on page left side. They typically are an irregular or irregular column. Some irregular space between page horizontally. To have an efficient, they should be able to be controlled.

**3 COLUMN GRID** are used for controlling the flow of content. Alternative use is newspaper, columns, right, and left. The columns are used to control the structure of the content.

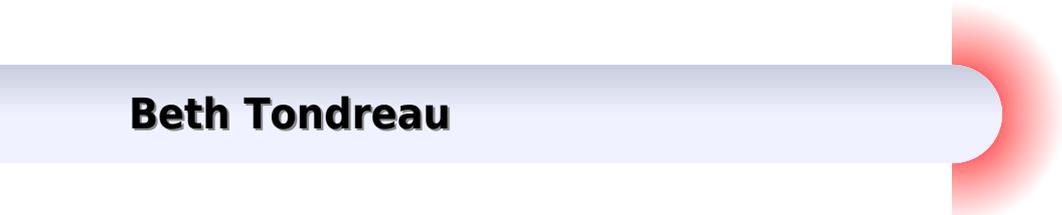

**GRID OF CONTENT**

- What is the subject of the content?
- How much of it is there?
- What is the goal?
- Who is the main focus of the content?
