SQL Database Reporting Simon Smart, 2019-11-11 If you re a beginner and want to learn practical SQL reporting skills in the shortest time possible this is the course for you The course s examples use free software meaning you don t need to make any additional purchases To follow the course s examples you will need a Windows computer Unlike many other courses this book works entirely with practical examples You won t be slowed down by long explanations of database theory and instead will get started doing useful work immediately and will be able to begin creating reports from SQL databases after just a few lessons Almost any modern organization can benefit from a staff member who knows how to generate database reports using the SQL language but SQL is a rare skill among most office staff Part of the reason that few people have SQL skills is that most related courses try to teach every aspect of database theory including database design and server administration This course is different It focuses entirely on database reporting and won t slow you down by trying to teach skills that you don t need This course also focuses on skills that will be useful on many different types of database rather than teaching obscure commands that will only work on a certain type of database
