A Study In Contrastive Analysis And Error Analysis:

Contrastive Analysis vs. Error Analysis in Respect of their Treatment of the Avoidance Phenomenon Elena Gluth, 2020-04-06 Seminar paper from the year 2003 in the subject English Language and Literature Studies Linguistics grade 1 5 Free University of Berlin Institut für Englische Philologie language English abstract This research paper compares contrastive analysis with the error analysis approach in respect of their treatment of avoidance behaviour It considers several researches on avoidance behaviour and shows that contrastive analysis predicts the avoidance phenomenon in most cases and therefore gives a complete description of the areas of difficulty for learners of a second language There exist two different approaches for the identification of possible learning problems in the second language acquisition contrastive analysis and error analysis A number of proponents of an error analysis approach claim that contrastive analysis cannot serve as an adequate tool for identifying the areas of difficulty for learners of a second language But on the other hand it has been noticed that error analysis is not able to explain the avoidance phenomenon since error analysis registers only the errors done by learners of a second language Avoidance behaviour represents a communicative strategy of a learner of a second language by which the learner prefers using a simpler form instead of the target linguistic element for the reason of difficulty on the part of the target feature Consequently avoidance behaviour serves as a manifestation of learning problems and its results should be definitely considered when compiling language syllabi and tests *Errors in Language Learning and Use* Carl James, 2013-12-02 *Errors in Language Learning and Use* is an up to date introduction and guide to the study of errors in language and is also a critical survey of previous work Error Analysis occupies a central position within Applied Linguistics and seeks to clarify questions such as Does correctness matter Is it more important to speak fluently and write imaginatively or to communicate one's message Carl James provides a scholarly and well illustrated theoretical and historical background to the field of Error Analysis The reader is led from definitions of error and related concepts to categorization of types of linguistic deviance discussion of error gravities the utility of teacher correction and towards writing learner profiles Throughout the text is guided by considerable practical experience in language education in a range of classroom contexts worldwide *Contrastive Study on Spanish and English* Beatriz Berruti, 2000 **The Study of Second Language Acquisition** Rod Ellis, 1994 This thorough introduction to second language research provides a comprehensive review of the research into learner language internal and external factors in language acquisition individual differences and classroom second language learning Contrastive Analysis Carl James, 1980 What is contrastive analysis The psychological basis of contrastive analysis The linguistic components of contrastive analysis Microlinguistic contrastive analysis Macrolinguistics and contrastive analysis Pedagogical exploitation of contrastive analysis Some issues of contention Resources in Education, 1976 **Contrastive Analysis and Error Analysis** Pedro Obando, 1982 **Contrastive Analysis and Error Analysis** Mohammad Hossein Keshavarz, 1993 *The Routledge Handbook of Korean as a Second Language* Andrew

Sangpil Byon, Danielle Ooyoung Pyun, 2022-04-19 *The Routledge Handbook of Korean as a Second Language* aims to define the field and to present the latest research in Korean as a second language KSL. It comprises a detailed overview of the field of KSL teaching and learning, discusses its development and captures critical cutting edge research within its major subfields. As the first handbook of KSL published in English, this book will be of particular interest to advanced undergraduates, graduate students, language teachers, curriculum developers and researchers in the fields of KSL and applied linguistics. While each chapter will be authored by internationally renowned scholars in its major subfields, the handbook aims to maintain accessibility so that it can also be of value to non-specialists.

A Survey of Contrastive Analysis and Error Analysis Wendee Olivia Smith Rogers, 1980

Error Analysis Jack C. Richards, 2015-12-14 The eleven essays in this book cover a wide range of topics from the role of interlanguage and the influence of external factors on the process of language learning to the development of syntax and the methodology of error analysis. Collectively they provide a valuable perspective on the learning process which both enriches our theoretical understanding of the processes underlying second language acquisition and suggests ways in which teaching practice may best exploit a learner's skills.

A Taste for Corpora Fanny Meunier, Gaëtanelle Gilquin, Magali Paquot, 2011 The eleven contributions to this volume written by expert corpus linguists tackle corpora from a wide range of perspectives and aim to shed light on the numerous linguistic and pedagogical uses to which corpora can be put. They present cutting edge research in the authors' respective domain of expertise and suggest directions for future research. The main focus of the book is on learner corpora but it also includes reflections on the role of other types of corpora such as native corpora, expert users corpora, parallel corpora or corpora of New Englishes. For readers who are already familiar with corpora, this volume offers an informed account of the key role that corpus data play in applied linguistics today. As for readers who are new to corpus linguistics, the overview of approaches, methods and domains of applications presented will undoubtedly help them develop their own taste for corpora. This volume has been edited in honour of Sylviane Granger who has been one of the pioneers of learner corpus research.

A Practical Application of a Study of Errors of College Francophone Students Learning English Louise Godin, 1982 The research on which this study is based found that 50% of the errors in English of French speaking students were due to interlingual causes and 50% had their source within the target language itself. The question of a correlation between the errors and the teaching method used is explored. Five methods are discussed and evaluated: grammar translation, direct, audiolingual, transformational grammar and cognitive code. In each case a correlation is made of the method with varieties and frequency of errors and the value of elements of the method is noted. Other pedagogical implications are drawn.

from the study of the frequency of errors for fifteen types of errors chosen as representatives of important classes of grammar or as general trouble makers Rank ordered lists are provided as well as tables and graphs illustrating the relative frequency of the errors Some of the conclusions are that negative transfer is an important source of errors and that with regard to intralingual errors overgeneralization seems to be the most common cause To reduce errors of all types and promote communication and fluency an eclectic method is suggested It is also noted that some errors persist on all levels even after many years of study AMH
