### CHAPTER 1

#### UNDERSTANDING HABITS

Introduction

What are habits? Habits are actions that you repeat regularly, often without thinking about them. They can be good or bad, and they can shape your life in significant ways. Understanding habits is the first step to changing them.

Why do we have habits? Habits are formed through a process called neuroplasticity, where the brain creates neural pathways that become automatic over time. This is why habits are so hard to break once they are established.

How can we change our habits? The key is to understand the triggers that lead to a habit and to replace the habit with a more desirable one. This process is often referred to as the 'habit loop'.
