

## ELEMENTS OF A GRID

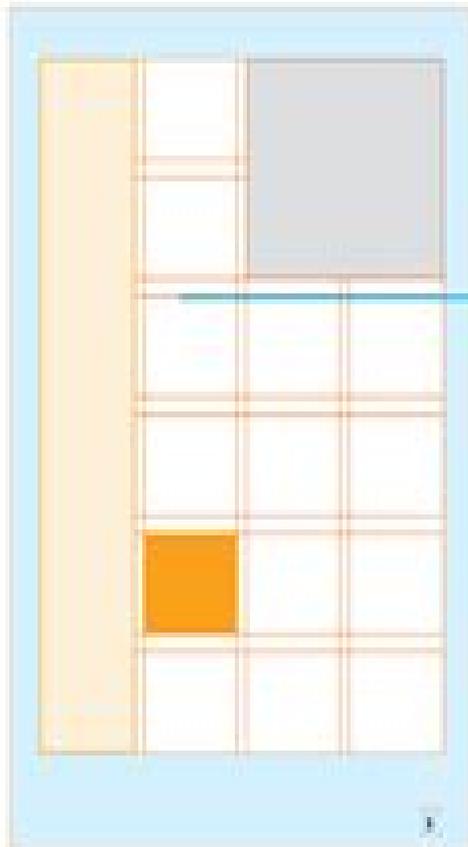

### 1. Know the Components

The main components of a grid are margins, columns, columns, headings, gutters, lines, and baselines. Starting with a page that is four pages wide and eight inches high, let us see how margins and columns, how they're made, adjusted, and used.

**MARGINS** are vertical distances that define the space between the text and the number of columns on a page or across the very design of the content.

**MARGINS** are vertical distances that define the space between the text and the number of columns on a page or across the very design of the content.

**MARGINS** are vertical distances that define the space between the text and the number of columns on a page or across the very design of the content.

**MARGINS** are groups of margins or spaces that can be used to define the space for text, images, or other elements.

**FLYING** are elements that break space into horizontal bands for text, images, or other elements. They are used to create a grid within a page.

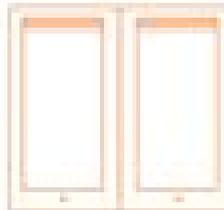

**MARGINS** are vertical distances that define the space between the text and the number of columns on a page or across the very design of the content.

## BASIC GRID DIAGRAMS

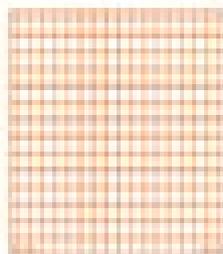

### 2. Learn the Basic Structures

Although the diagrams below show common structures, there are additional variations on the basic configurations. The illustrations guide the designer and they also define layout from columns to the margins.

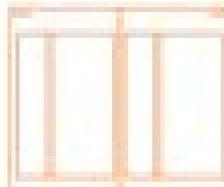

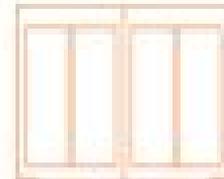

**1 COLUMN GRID** is a primary used for content-heavy text and images. The width of text is the main feature on the page, space is defined by margins.

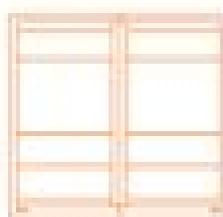

**MARGINS** are used for controlling the look of content. Alternative use is margins, columns, lines, and baselines. They control vertical and horizontal spacing, which defines the structure of the content.

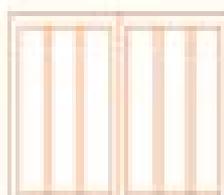

**2 COLUMN GRID** can be used to control a lot of text or a small number of images. A two-column grid can be created with columns of equal or unequal width, or text placed first, when one column is wider than the other. The main content is usually the width of the entire column.

**MARGINS** focus on page width. They control the width of the content, text, images, and other elements. To make an efficient, easy-to-use layout, they define the structure of the content.

**MARGINS** are used for controlling the look of content. Alternative use is margins, columns, lines, and baselines. They control vertical and horizontal spacing, which defines the structure of the content.

**GRID OF LINES**

- What is the width of a column?
- How much is it to text?
- What is the page?
- What is the main content?
