Marcus Callies, 2009-04-08 This book presents the first detailed and comprehensive study of information highlighting in advanced learner language echoing the increasing interest in questions of near native competence in SLA research and contributing to the description of advanced interlanguages

It examines the production and comprehension of specific means of information highlighting in English by native speakers and German learners of English as a foreign language presenting triangulated experimental and learner corpus data as corroborating evidence

The study focuses on learners use of discourse pragmatically motivated variations of the basic word order such as inversion preposing

and it and wh clefts an underexplored field in SLA research to date The book also provides a critical re assessment of the study of pragmatics within SLA It has largely been neglected to date that L2 pragmatic knowledge includes more than the sociopragmatic and pragmalinguistic abilities for understanding and performing speech acts Thus the book argues for an extension of the scope of inquiry in interlanguage pragmatics beyond the cross cultural investigation of speech acts It also discusses pedagogical implications for foreign language teaching and will be of interest to applied linguists and SLA researchers language teachers and curriculum designers

publikace je sborník 21 příspěvků přednesených na 9 roční konferenci Teaching and Learning Corpora, která se uskutečnila na Masarykově univerzitě v létě 2010. Statisticky byly vybrány na základě dvou anonymních posudků poskytnutých vdeckou radou konané konference. Kniha se zabývá rozmanitými způsoby využití jazykových korpusů při výuce a při studiu cizího jazyka a je rozdělena do čtyř oddílů. Oddíl 1 a 2 pohledy na korpus jako vstupní zdroj zkoumají nejednoobecně, jak mohou korpusy obohatit výuku jazyka, potom na konkrétních případech ukazují, jak převzaté poznatky do praxe a nakonec hodnotí jednotlivé využití korpusu studenty. Oddíl 3 a 4 tematizují korpus jako nástroj, který představuje porovnání s korpusy rodilých mluvčích a následnou identifikaci chyb i problémových oblastí, ale také ukazují, co studenti mohou vidět a skutečně v různých rovinných pokroích a pokoušeli se zodpovědně na otázky, co nám tyto informace říkají o samotném procesu učení.

*World Englishes and Second Language Acquisition* Michael Percillier, 2016-09-07 Bridging the gap between the fields of World Englishes and Second Language Acquisition, this volume offers an in-depth comparative analysis of two postcolonial varieties of English: Singapore and Malaysian English and neighbouring Indonesian learner English, in order to examine the Outer Expanding Circle distinction and shed light on the genesis of postcolonial varieties of English. The study identifies and analyses more than thirty linguistic features in the categories phonology, morphology, syntax and discourse, concluding that in spite of clear syntactic differences the distinction between the Outer and Expanding Circles is gradual rather than strictly categorical and should rely on current sociolinguistic realities rather than on historical criteria. The volume will be highly relevant for researchers interested in the dynamics of Outer Circle and Expanding Circle Englishes, the structural and sociolinguistic aspects of English in Southeast Asia or the integration of the paradigms of World Englishes and Second Language Acquisition. *World Englishes and Second Language Acquisition* received honourable mention at the 2018 ESSE Book Awards.

**How to Use Corpora in Language Teaching** John McHardy Sinclair, 2004-01-01 After decades of being overlooked, corpus evidence is becoming an important component of the teaching and learning of languages. Above all, the profession needs guidance in the practicalities of using corpora: interpreting the results and applying them to the problems and opportunities of the classroom. This book is intensely practical, written mainly by a new generation of language teachers who are acknowledged experts in central aspects of the discipline. It offers advice on what to do in the classroom, how to cope with teachers' queries about language, what corpora to use (including learner corpora and spoken corpora) and how to handle the variability of language; it reports on some current research and explains how the access software is constructed, including an opportunity for the practitioner to write small but useful programs, and it takes a look into the future of corpora in language teaching.

*Metaphors in Learner English* Susan Nacey, 2013-11-15 This volume presents results from a corpus-based investigation into the metaphorical production of foreign language learners, comparing texts written by Norwegian L2 learners of English with those written by British L1 students. Three types of questions are addressed: The first has empirically measured answers: For example, do L2 English writers produce more metaphors than L1 novice writers? How frequent are novel metaphors in an L2 as compared with an L1? The

second type has more subjective answers How creatively do L2 English learners employ metaphor Are they even expected to be able to produce metaphor at all The third type combines theoretical and methodological perspectives How is metaphorical creativity identified What is the potential role of metaphoric competence Most importantly how are metaphors identified To this end the newly developed Metaphor Identification Procedure is tested and critiqued This book is intended for metaphor researchers corpus linguists applied linguists and language educators [The Massachusetts Register](#) ,2017-07-28
