Interview Insights

Published Jul 17, 2022

As a SAP Solution Architect you are responsible for designing, developing, and deploying SAP solutions that meet the specific needs of your clients. This includes creating detailed designs and blueprints for the system, as well as mapping the client's business processes to the SAP solution.

In order to be successful in this role, you need to have a deep understanding of SAP functionality as well as the business processes of your clients. You also need to be able to communicate complex concepts to non-technical stakeholders.

If you're interviewing for a SAP Solution Architect role, you can expect to be asked questions about your experience with SAP, your understanding of business processes, and your ability to communicate complex concepts. To help you prepare, we've compiled a list of sample questions and answers that you can use to develop your own responses.

COMMON SAP SOLUTION ARCHITECT INTERVIEW QUESTIONS

- Are you familiar with the SAP product line?
- What are some of the most important skills for a Solution Architect to have?
- How do you determine the best way to implement a new system?

EXPAND +

Are you familiar with the SAP product line?

The interviewer may ask this question to assess your knowledge of the SAP product line and how it relates to their organization. Use your answer to highlight any experience you have with SAP products, including which ones you've used in the past and what your overall opinion is on them.

Example: *"I am familiar with the SAP product line, having worked with several of its solutions in my previous role as a solution architect. I found that SAP's ERP software was very useful for managing company-wide operations, but I also found that some of its other products were not as effective. For example, I found that while SAP CRM can be helpful for customer relationship management, it doesn't offer much functionality when compared to more robust tools like Salesforce."*
