Green, 2019-12-19 The fourth edition of *Statistical Concepts for the Behavioral Sciences* emphasizes contemporary research problems to better illustrate the relevance of statistical analysis in scientific research. All statistical methods are introduced in the context of a realistic problem, many of which are from contemporary published research. The uses of statistics are then developed and presented in a conceptually logical progression for increased comprehension by using the accompanying workbook and the problem sets. Several forms of practice problems are available to students and presented in a manner that assists students in mastering component pieces before integrating them together to tackle more complicated real-world problems. **Through the Eyes of a Concerned Liberal** Earle F.
