written by a philosopher for other philosophers and for that section of the reading public who buy in large quantities and no  
doubt devour with great earnestness the popular books written by scientists for their enlightenment We common readers to  
adapt a phrase from Samuel Johnson are fitted neither to criticize physical theories not to decide what precisely are their  
implications We are dependent upon the scientists for an exposition of those developments which so we find them  
proclaiming have important and far reaching consequences for philosophy Unfortunately however our popular expositors do  
not always serve us very well The two who are most widely read in this country are Sir Arthur Eddington and Sir James Jeans  
They are not always reliable guides Their influence has been considerable upon the reading public upon theologians and  
upon preachers they have even misled philosopher who should have known better Accordingly it has seemed to me to be  
worth while to examine in some detail the philosophical views that they have put forth and to criticize the grounds upon  
which these views are based     **Shipbuilder** ,1919     The American Mathematical Monthly ,1921     **Monthly Record of**
