How We Do It Robert Martin,2013-06-11 A primatologist explores the mystery of the origins of human reproduction explaining that understanding the evolutionary past can provide insight into what worked what didn't and what it all means for the future of mankind *The Biology of Human Reproduction* J. J. Head,John Juan Head,Cynthia Clarke,1979 **The Biodemography of Human Reproduction and Fertility** Joseph Rodgers,Hans-Peter Kohler,2002-09-30 The book that you hold in your hands is the second in a series The two titles in the series are the following Genetic Influences on Human Fertility and Sexuality Theoretical and Empirical Contributions from the Biological and Behavior Sciences Edited by Joseph Lee Rodgers David C Rowe Warren B Miller Published by Kluwer Academic Press 2000 The Biodemography of Human Reproduction and Fertility Edited by Joseph Lee Rodgers Hans Peter Kohler Published by Kluwer Academic Press 2002 The series has published chapters by researchers who study human fertility from a particular perspective Biodemography We welcome your interest and participation in this developing subfield Or perhaps biodemography may be better referred to as a superfield Because biodemography so naturally crosses interdisciplinary boundaries and because its application draws together researchers from disparate disciplines it may well be more appropriate to consider that biodemography subsumes a number of other disciplines rather than the other way around In this preface we will describe our own efforts and those of many others to promote and develop the study of human fertility using methods models and theories from both biological and

demographic domains In December 1997 25 participants from three different countries gathered in Tucson Arizona for a small conference with the title Genetic Influences on Fertility Related Processes That conference represented a fascinating blending of research from two apparently separate domains Biology of Human Reproduction World Health Organization,1964-01-01 **Dynamics of Human Reproduction** James W. Wood,2017-09-29 Awarded the W W Howells Award for the Outstanding Book in Biological Anthropology this volume presents a comprehensive integrated and up to date overview of the major physiological and behavioral factors affecting human reproduction In attempting to identify the most important causes of variation in fertility within and among human populations Wood summarizes data from a wide range of societies Trained as an anthropologist as well as a demographer he devotes special attention to so called natural fertility populations in which modern contraceptives and induced abortion are not used to limit reproductive output Such an emphasis enables him to study the interaction of biology and behavior with particular clarity The volume weaves together the physiological demographic and biometric approaches to human fertility in a way that will encourage future interdisciplinary research Instead of offering a general overview the focus is to answer one question Why does fertility and the number of live births vary from couple to couple within any particular population and from population to population across the human species as a whole Topics covered include ovarian function conception and pregnancy intrauterine mortality reproductive maturation and senescence coital frequency and the waiting time to conception marriage patterns and the initiation of reproduction the fertility reducing effects of breastfeeding the impact of maternal nutrition on reproduction and reproductive seasonality This unique combination of comprehensive subject matter and an integrated analytical approach makes the book ideally suited both as a graduate level textbook and as a reference work *The Biology and Medical Dynamics of Human Reproduction* Laurence A. Cole,2014 This book covers human female biology how the menstrual cycle is controlled how steroidogenesis is controlled and how the follicle and the egg are formed This book covers male biology and how steroid hormones are made and how sperm are synthesised and matured Then this book covers sex biology such as how the brain deals with libido and sexual images and how the brain controls erection and ejaculation This book deals with how sperm are matured upon intercourse how fertilisation takes place and how the fertilised embryo is matured and implants in the uterus The subjects of sexuality and homosexuality chromosome disorders and hydatidiform moles are carefully discussed and considered Sexual maturation of the foetus during pregnancy is carefully considered This book carefully describes puberty adrenarche and menarche The subject of menopause is carefully considered The subject of major bacterial and viral and sexual diseases is carefully considered as is the subject of reproductive cancers In writing this book care has been taken to update everything and check out the information available on medline and on the internet This is a textbook for undergraduates medical students and graduates describing all the details of human reproduction It is also the only up to date book on the market Having examined a total 70 books on human reproduction obstetrics and gynaecology they all with no

Hall,2015-03-17 The Biology Physiology and Sociology of Reproduction is a classic biology text by Winfield S Hall dealing with human reproduction I have no hesitancy in saying that it is by far the best presentation of this very important subject that I have ever seen It answers many important questions for which I have seen no answer elsewhere Prof William R Manning Purdue University **Human Reproduction and Developmental Biology** David J. Begley,J. A. Firth,J. R. S. Hault,1980 **On Fertile Ground** Peter Thorpe ELLISON,Peter Thorpe Ellison,2009-06-30 Reproduction is among the most basic of human biological functions both for our distant ancestors and for ourselves whether we live on the plains of Africa or in North American suburbs Our reproductive biology unites us as a species but it has also been an important engine of our evolution In the way our bodies function today we can see both the imprint of our formative past and implications for our future It is the infinitely subtle and endlessly dramatic story of human

reproduction and its evolutionary context that Peter T Ellison tells in *On Fertile Ground* Ranging from the latest achievements of modern fertility clinics to the lives of subsistence farmers in the rain forests of Africa this book offers both a remarkably broad and a minutely detailed exploration of human reproduction Ellison a leading pioneer in the field combines the perspectives of anthropology stressing the range and variation of human experience ecology sensitive to the two way interactions between humans and their environments and evolutionary biology emphasizing a functional understanding of human reproductive biology and its role in our evolutionary history Whether contrasting female athletes missing their periods and male athletes using anabolic steroids with Polish farm women and hunter gatherers in Paraguay or exploring the intricate choreography of an implanting embryo or of a nursing mother and her child *On Fertile Ground* advances a rich and deeply satisfying explanation of the mechanisms by which we reproduce and the evolutionary forces behind their design

Textbook of Human Reproductive Genetics Stéphane Viville, Karen D. Sermon, 2023-01-05 A basic understanding of human genetics is vital for all those working in the field of assisted human reproduction Genetic makeup can hamper reproduction and insight into this is making genetic diagnosis and counselling increasingly important This fully updated textbook continues the clear structure of the original edition beginning with a chapter on the basics of genetics and cytogenetics Genetic causes of infertility and the effect of epigenetics and transposons on fertility are discussed in detail Several new chapters are included in this edition reflecting the advances of the field including preconception genetic analysis and screening in IVF and mitochondrial genetics Combining genetics reproductive biology and medicine this is an essential text for practitioners in reproductive medicine and geneticists involved in the field looking to improve their knowledge of the subject and provide outstanding patient care
