dominating conversations and it s revolutionizing the way we work learn play and create Yet search for a manual and the resources you ll find are most likely to cover little more than how machine learning works and the different industries using it But that isn t really what you want is it You already know that AI has huge potential What you really want to know is which tools to use to get the best results for the specific projects you want to use it for Perhaps you re already proficient in using AI or maybe you re just starting out Either way you want to know the full range of tools you have at your disposal and exactly where to find them What you need is a directory of all the most useful practical and popular tools available and you want it to be organized logically so that you can find exactly what you need and quickly just like you could with an old school phonebook Whether you ve been collaborating with AI for a while or you re only just beginning to experiment the best way to make the most of it is to choose the right tool for the job from the outset With so many options out there you re going to need this directory to help you pick exactly what you need for your project otherwise you re going to miss out on the best options Forget lengthy how to guides that give you a lot of background information but no real practical tools You need an extensive easy to navigate encyclopedia that you can pick up at any time to direct you to the right tools whenever you need them
