Ordering America William H. Young, 2010. Ordering America painting a felicitous portrait of Western civilization shows that its defining ideals, rooted in man's common human nature, a perception newly substantiated by modern evolutionary psychology, were best fulfilled by realization of the American founding order. Twentieth century progressivism and postmodern multiculturalism detoured America down the way of social constructionism. Human nature and equality are produced by culture and the state through groups. The book sets a course to revive the Western ideals and return to an opportune center-right American order, applying latest scientific insights and restoring individual responsibility and reciprocity under more limited, still energetic government befitting our century.
