Ronald K. Leonard, Richard Teal

2012 Road Bike Buyers Guide:

Buyer's Guide, 2002 **Why Would Anyone Do That?** Stephen C. Poulson, 2016-04-19 Triathlons such as the famously arduous Ironman Triathlon and extreme mountain biking hair raising events held over exceedingly dangerous terrain are prime examples of the new lifestyle sports that have grown in recent years from oddball pursuits practiced by a handful of characters into multi million dollar industries In *Why Would Anyone Do That* sociologist Stephen C Poulson offers a fascinating exploration of these new and physically demanding sports shedding light on why some people find them so compelling Drawing on interviews with lifestyle sport competitors on his own experience as a participant on advertising for lifestyle sport equipment and on editorial content of adventure sport magazines Poulson addresses a wide range of issues He notes that these sports are often described as authentic challenges which help keep athletes sane given the demands they confront in their day to day lives But is it really beneficial to work so hard at play Is the discipline required to do these sports really an expression of freedom or do these sports actually impose extraordinary degrees of conformity upon these athletes *Why Would Anyone Do That* grapples with these questions and more generally with whether lifestyle sport should always be considered good for people Poulson also looks at what happens when a sport becomes a commodity even a sport that may have begun as a reaction against corporate and professional sport arguing that commodification inevitably plays a role in determining who plays and also how and why the sport is played It can even help provide the meaning that athletes assign to their participation in the sport Finally the book explores the intersections of race class and gender with respect to participation in lifestyle and endurance sports noting in particular that there is a near complete absence of people of color in most of these contests In addition Poulson examines how concepts of masculinity in triathlons have changed as women s roles in this sport increase *John Deere Snowmobiles* Ronald K. Leonard, Richard Teal, 2014-02-07 Long respected as a manufacturer of sturdy agricultural machinery the John Deere Company began in the 1960s to build a line of consumer products in a dedicated factory in Horicon Wisconsin Starting with a lawn and garden tractor in 1963 Deere soon entered the fast growing snowmobile market introducing two models in 1971 The next 13 years would see a succession of models as Deere vied against tough competitors in a weather dependent market This detailed history written by two key participants in

the snowmobile program describes the development of John Deere snowmobiles from start to finish the design and engineering decisions that shaped each important model reception of the snowmobiles by consumers the factory race teams the introduction of front engine and water cooled models the process of selecting engines and negotiating with suppliers including when problems developed and the snowmobiles impact on product engineering The text provides an inside view of Deere s Consumer Products Division at a time of rapid growth and of the people and processes that made it all happen
