The Julius Petersen Graph Theory Centennial Lars Døvling Andersen, 1992 Julius Petersen s paper Die Theorie der regulauml ren graphs in Acta Mathematica volume 15 1891 stands at the beginning of graph theory as we know it today The Danish group of graph theorists decided in 1985 to mark the 150th birthday of

Petersen in 1989 as well as the centennial of his paper It was felt that the occasion called for a presentation of Petersen s famous paper in its historical context and in a wider sense of Petersen s life and work as a whole However the readily available information about Julius Petersen amounted to very little not even a full bibliography existed and virtually nothing was known about the circumstances that led him to write his famous paper The study of Petersen s life and work has resulted in several papers in particular a biography a bibliography an annotated edition of the letters surrounding Petersen s paper of 1891 an analysis of Petersen s paper and an annotated edition of parts of Petersen s correspondence with Sylow on Galois theory The first four of these papers together with a survey of matching theory form the first part of this book In addition to these five special papers there are papers submitted in the celebration of the Petersen centennial
