**Thinking Through Poetry** Marjorie Levinson, 2018-07-04 Thinking through Poetry Field Reports on Romantic Lyric pursues two goals The title signals the contribution to debates about reading Do we think through by means of with poems sympathetically elaborating their surfaces Is this compatible with a second meaning thinking through poems to their end solving a problem getting to its root its deep truth Third can we square these surface and depth readings with a speculative philosophical criticism to which the poem carries us where through denotes a going beyond All three meanings of through are in play throughout The subtitle applies field first to Romantic studies since the 1980s a field that this project reflects upon from beginning to end Examples are drawn especially from Wordsworth but also from Coleridge and in assessing Romanticism's afterlife from Stevens Field also characterizes the shift from a unitary to a field concept of form during that time span a shift pursued through prolonged engagement with Spinoza Field thus underscores the synthesis of form and history the importance of analytic scale to that synthesis and the displacement of entity text by relation as the object of investigation While the book historically connects early nineteenth century intellectual trends to twentieth and twenty first century scientific revolutions its focuses on introducing new models to literary criticism Unlike accounts of the influence of science on literature or various literature X approaches literature and ecology literature and cognitive science it constructs its object of inquiry in a way cognate with work in non humanities disciplines thus highlighting a certain unity to human knowledge The claim is that specialists in literature should think the way distinguished scientists think and vice versa

**Christian Allegory in Early Hispanic Poetry** David William Foster, 2014-07-15 Distinguishing figural or typological allegory a method adapted from the Christian exegesis of the Old Testament from the broader Hellenistic concept of allegory this book examines its use in representative poems of early Hispanic literature The author focuses on the thematic and structural employment of this originally nonliterary device and comments on the literary problems it posed and the artistic effects which were achieved by it The development of this particular allegorical method in medieval Hispanic literature works in Spanish Portuguese Galician and Catalan he shows was fully equal to that found in the medieval Latin Italian and English literatures and an understanding of its use serves to clarify the interpretation of many individual poems **The Princeton**

**Encyclopedia of Poetry and Poetics** Stephen Cushman, Clare Cavanagh, Jahan Ramazani, Paul Rouzer, 2012-08-26 The most important poetry reference for more than four decades now fully updated for the twenty first century Through three editions over more than four decades The Princeton Encyclopedia of Poetry and Poetics has built an unrivaled reputation as the most comprehensive and authoritative reference for students scholars and poets on all aspects of its subject history movements genres prosody rhetorical devices critical terms and more Now this landmark work has been thoroughly revised and updated for the twenty first century Compiled by an entirely new team of editors the fourth edition the first new edition in almost twenty years reflects recent changes in literary and cultural studies providing up to date coverage and giving greater

attention to the international aspects of poetry all while preserving the best of the previous volumes At well over a million words and more than 1 000 entries the Encyclopedia has unparalleled breadth and depth Entries range in length from brief paragraphs to major essays of 15 000 words offering a more thorough treatment including expert synthesis and indispensable bibliographies than conventional handbooks or dictionaries This is a book that no reader or writer of poetry will want to be without Thoroughly revised and updated by a new editorial team for twenty first century students scholars and poets More than 250 new entries cover recent terms movements and related topics Broader international coverage includes articles on the poetries of more than 110 nations regions and languages Expanded coverage of poetries of the non Western and developing worlds Updated bibliographies and cross references New easier to use page design Fully indexed for the first time *Annual Bibliography of English Language and Literature* Modern Humanities Research Association,2005 Includes both books and articles **Apollinaire, Visual Poetry, and Art Criticism** Willard Bohn,1993 More than anything perhaps this volume strives to elucidate the concept of poesie critique which has received very little attention This omission is surprising since the genre influenced the Surrealist invention of poesie synthetique as well as many writers who followed Apollinaire trying to reconcile poetry and criticism [Let Me See Your Form](#) Phillip D. Roberts,2007-03-09 This study tackles the problem of the Song of Song s structure by beginning at the bottom the microstructure of the Song rather than at the top By employing a new type of rhetorical method Professor Roberts defines each of the minimal structural units of the Song by identifying the formal poetic features that mark its opening and closing coupled with the poetic features that create cohesion within it Moving up the Song s structural ladder larger units are identified with the same technique While this study does not identify an overall structure it does demonstrate how recognition of these formal structuring devices can help the interpreter define the structural units of the Song with far greater precision The final chapter presents a catalog of these formal poetic features that typically mark the opening and closure of structural units in the Song as well as those that effect cohesion Within is a catalog that can be refined and enlarged by application of the same method to other poetic texts Other exegetical insights abound Professor Roberts demonstrates a more highly structured pattern of the wasfs than has been recognized heretofore and proposes a new interpretation of the adjuration refrain He identifies a type of phonological anacrusis employed numerous times in the Song and addresses almost every text critical issue in the Song many of which are resolved by attention to poetic structuring devices **Courses and Programs** Iowa State University,1997 **Making the Miscellany** Megan Heffernan,2021-03-05 In Making the Miscellany Megan Heffernan examines the poetic design of early modern printed books and explores how volumes of compiled poems which have always existed in practice responded to media change in sixteenth and seventeenth century England Heffernan s focus is not only the material organization of printed poetry but also how those conventions and innovations of arrangement contributed to vernacular poetic craft the consolidation of ideals of individual authorship and centuries of literary history The arrangement of printed compilations

contains a largely unstudied and undertheorized archive of poetic form Heffernan argues In an evolving system of textual transmission compilers were experimenting with how to contain individual poems within larger volumes By paying attention to how they navigated and shaped the exchanges between poems and their organization she reveals how we can witness the basic power of imaginative writing over the material text *Making the Miscellany* is also a study of how this history of textual design has been differently told by the distinct disciplines of bibliography or book history and literary studies each of which has handled and obscured the formal qualities of early modern poetry compilations and the practices that produced them Revisiting these editorial and critical approaches this book recovers a moment when compilers poets and readers were alert to a poetics of organization that exceeded the limits of the individual poem *Contemporary Visual Poetry* Fiona Becket, 2025-09-15 This book examines contemporary visual poetry and how conceptual writing poem objects and computational texts shape a posthumanist understanding that is situated First the eye is theorised with respect to ethical understanding When visual poets reclaim vision visual poetics becomes a feminist praxis In Paula Claire and Maggie O Sullivan visual poetry becomes an ecological practice concerned with connectivity in the entanglements of natureculture In O Sullivan Campanello Bergvall and Philip spatial and temporal sense de formation sustains radical forms of voicing and eyewitness Finally works by Mez Breeze and Stephanie Strickland expand our understanding of visual poetry in digital electronic virtual reality and artificial intelligence contexts in which technology and affect are intimately connected These visual texts open up Braidotti s question with respect to how we are to visualize the subject as a transversal entity encompassing the human our genetic neighbours the animals and the earth as a whole and to do so within an understandable language *The British National Bibliography* Arthur James Wells, 2009 **Preminger, Editor.
