Evaluation Thesaurus Michael Scriven, 1991-08-27 Written by one of the leaders in evaluation Evaluation Thesaurus Fourth Edition provides readers with a quick analysis of the leading concepts positions acronyms processes techniques and checklists in the field of evaluation Containing nearly 2000 entries Michael Scriven's thesaurus offers professionals and students a guide for understanding the relation of evaluation to the doctrine of value free social science ways to integrate the parts of multi dimensional evaluations into an overall rating the realities of evaluation consulting and techniques for the use of spreadsheets in qualitative evaluation *Core Concepts in Evaluation* Lori A. Wingate, Ayesha S. Boyce, Lyssa Wilson Becho, Kelly N. Robertson, 2024-07-09 This unique book features original writings from evaluation's foundational thinkers together with new commentaries from contemporary authors Each section includes an introduction to a core evaluation concept by the editors a classic reading two commentaries on that topic by contemporary authors and a reflection guide written by the editors Metadata and Semantic Research Salvador Sanchez-Alonso, Ioannis N. Athanasiadis, 2010-10-08 Metadata and semantic research is a growing complex ecosystem of conceptual theoretical methodological and technological frameworks offering innovative computational solutions in the design and development of computer based systems Within this perspective researchers working in the area need to further develop and integrate a broad range of methods results and solutions coming from different areas MTSR has been designed as a forum allowing researchers to present and discuss specialized results as general contributions to the field This volume collects the papers selected for presentation at the 4th International Conference on Metadata and Semantic Research MTSR 2010 held in Alcalá de Henares a world heritage city and birthplace of Miguel de Cervantes at the University of Alcalá October 20-22 2010 The first MTSR conference was held online in 2005 followed by two more editions in Corfu 2007 and in Milan 2009 The experience acquired during the past five years and the warm welcome of MTSR by the research community encouraged us to organize this new edition of the series and turn it into a yearly event According to the number and quality of the contributions submitted for revision our 2010 effort was again a considerable success *Evaluation Research Methods* Elliot Stern, 2005-01-21 Evaluation is a set of research methods and associated methodologies with a distinctive purpose They provide a means to judge actions and activities in terms of values criteria and standards This collection offers a complete guide to evaluations research methods VOLUME ONE Foundations Issues in Evaluation VOLUME TWO Evaluation Practice for Engagement VOLUME THREE Explanatory and Economic Models VOLUME FOUR Strengthening Policies and Programmes **Evaluation and Education** Milbrey Wallin McLaughlin, Denis Charles Phillips, 1991 Qualitative Research in Health Care Immy Holloway, 2005-06-16 This book is a comprehensive guide to selecting approaches and carrying out qualitative research Rather than being prescriptive it provides information on various data collection procedures and how to make decisions about specific qualitative approaches Its aim is to extend researchers understanding of the participants in research be they patients peers or students and to improve

clinical practice on the basis of evidence from qualitative studies Each chapter is illustrated with examples of research projects Topics discussed include The nature of qualitative research The selection of a specific qualitative research approach The collection and analysis of qualitative data Writing up qualitative research Written by contributors who are academics and or practitioners from a variety of health professions and disciplines Qualitative Research in Health Care is key reading for all health professionals academic and clinical who are involved in research work as well as advanced undergraduate and postgraduate students in health studies Contributors Mark Avis Rosalind Bluff Dawn Freshwater Kathleen Galvin Immy Holloway Ron Iphofen Jenny Kitzinger Debbie Kralik John Larsen Frances Rapport Siobhan Sharkey Andrew Sparkes Clare Taylor Les Todres Stephen Wallace *Congress and Program Evaluation* Clinton T. Brass, Blas Nunez-Neto, Erin D. Williams, 2008 Program evaluations can play an important role in public policy debates and in oversight of government programs potentially affecting decisions about program design operation and funding One technique that has received significant recent attention is the randomised controlled trial RCT There are also many other types of evaluation including the observational and qualitative designs **The Cumulative Book Index**, 1930 **Standards for Evaluation Practice** Peter Henry Rossi, 1982 *Evaluation Roots* Marvin C. Alkin, 2004-02-24 Concern for evaluation theoretical prescriptions emerged about 40 years ago giving it a history that is both recent enough to be part of the living experience of many of today's theorists and old enough to afford an opportunity for an analysis of how the field has evolved over time This book examines current evaluation theories and traces their evolution with the point of view that theories build upon theories and therefore evaluation theories are related to each other Initially all evaluation was derived from social science research methodology and accountability concerns The way in which these evaluation roots grew to form a tree helps to provide a better understanding of evaluation theory Thus the book uses an evaluation theory tree as its central metaphor The authors posit that evaluation theories can be classified by the extent to which they focus on methods uses or valuing these three approaches form the major limbs of the tree In addition to the authors overview which analyzes the evaluation theory tree and connections among theories the book contains essays by most of the leading evaluation theorists In these pieces the evaluators comment on their own development and give their views of their placement upon the tree **Professional Evaluation** Ernest R. House, 1993 The book provides an in depth examination of the history and discipline of evaluation as well as its treatment of the subjects of ethics justice and professionalism The strength of the book is without question Ernest R House's many years of experience as an evaluator and his proposition that evaluation as an institution profession and discipline represents a strong and significant force in the process of social change Evaluation and Program Planning This book pushes back the frontiers Ernest R House has already established with his previous work in the political and social dimensions of professional evaluation It represents the thoughtful reflections of an experienced evaluator with an unusual talent for original perspectives on this complex and vital emergent discipline Michael Scriven Director Evaluation Institute

Pacific Graduate School of Psychology For 25 years Ernest R House has watched us who specialize in program evaluation recording and interpreting in the best of qualitative ways the maturation of our field In this book he portrays us as white collar migrant workers carded coddled and manipulated by governments reluctant to leave the comfort of social science but having outgrown that dependency reaching toward what Michael Scriven called a transdiscipline If Lee Cronbach once made us wince by revealing our political blood House startles us exposing neural ties with ethics technocracy capitalism manifest destiny even craniometry Popping bluerock metaphors from liberal left to libertarian right House declares us to be complex creature of nature and nurture seldom acting of our own free will It is a magical mythological tour Never before has the special work of the program evaluator been shown to be immersed in and buffeted by such a diverse array of social political and philosophical currents In an appealing mix of personal reminiscence and social commentary Ernie House has collected a fine album of the early years of program evaluation Robert E Stake Center for Instructional Research and Curriculum Evaluation University of Illinois at Urbana Champaign Why do we have evaluation Is evaluation a discipline How much impact does evaluation have on government education or politics Can social problems such as poverty be solved like engineering problems by the application of resources and intelligence By exploring how evaluation has evolved as a discipline science and profession House examines how evaluation impacts modern societies and the issues that this impact social force raises for evaluators Addressing such issues as pluralism vs managerialism quantitative vs qualitative methodologies the purpose of higher education for knowledge production vs educating people for professions clientism and multicultural concerns House traces how evaluation has evolved as a basis for determining where the field should go and how
