Economic and Financial Analysis for Criminal Justice Organizations Daniel Adrian Doss, William H. Sumrall III, David H. McElreath, Don W. Jones, 2013-10-28 From small law offices to federal agencies all entities within the justice system are governed by complicated economic factors and face daily financial decision making A complement to Strategic Finance for Criminal Justice Organizations this volume considers the justice system from a variety of economic and financial perspectives and introduces Economics for Lawyers Richard A. Ippolito, 2012-01-12 Whether dealing with contracts tort actions or government regulations lawyers are more likely to be successful if they are conversant in economics Economics for Lawyers provides the essential tools to understand the economic basis of law Through rigorous analysis illustrated with simple graphs and a wide range of legal examples Richard Ippolito focuses on a few key concepts and shows how they play out in numerous applications There are everyday problems What is the social cost of legislation enforcing below market prices minimum wages milk regulation and noncompetitive pricing Why are matinee movies cheaper than nighttime showings And then there are broader questions What is the patent system's role in the market for intellectual property rights How does one think about externalities like airport noise Is the free market a regulated solution or tort law the best way to deliver the efficient amount of harm in the workplace What is the best approach to the question of economic compensation due to a person falsely imprisoned Along the way readers learn what economists mean when they talk about sorting signaling reputational assets lemons markets moral hazard and adverse selection They will learn a new vocabulary and a whole new way of thinking about the world they live in and will be more productive in their professions Study Guide for Mankiw's Principles of Economics, 6th N. O'Brien Jr., 2020-05-20 This book presents a distinctive version of a contractarian approach to law and justice The work argues that law and justice are social norms that arise from a process of social evolution and are binding only if and to the extent that they are mutually beneficial It explicitly rejects accounts of law and justice that are based on morality on the basis that morality itself is only legitimately founded on mutual advantage But it also rejects most existing versions of contractarianism which are based on ideas of hypothetical agreements by rational contractors in favour of an approach that is based on actually existing social norms but

advocates critically examining these norms and discarding those that are not truly mutually beneficial The first half of the book develops the approach while the second half explores some of its implications for law It argues for a left libertarian approach to property an approach largely based on the common law of tort contract and criminal law and a rejection of most statutory law which is based not on mutual advantage but rather on benefiting some at the expense of others However it ultimately recognises that there are those who want a more extensive state than this approach allows and advocates a strong form of federalism to allow this provided robust exit rights are provided The book combines political philosophy economics and law into an approach that is broadly libertarian but distinctive in many respects It will be of interest to scholars in all three of those disciplines
