, 2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of  
the state of discipline The number of peer reviewed papers published in geomorphic journals has grown steadily for more  
than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary  
background geography geology ecology civil engineering computer science geographic information science and others has  
expanded dramatically As more good minds are drawn to geomorphology and the breadth of the peer reviewed literature  
grows an effective summary of contemporary geomorphic knowledge becomes increasingly difficult The fourteen volumes of  
this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term  
paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise  
summary of a particular topic Information on the historical development of diverse topics within geomorphology provides  
context for ongoing research discussion of research strategies equipment and field methods laboratory experiments and  
numerical simulations reflect the multiple approaches to understanding Earth's surfaces and summaries of outstanding  
research questions highlight future challenges and suggest productive new avenues for research Our future ability to adapt  
to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of  
Earth's diverse surfaces This Treatise on Geomorphology provides a useful synthesis of the state of the discipline as well as  
highlighting productive research directions that Educators and students researchers will find useful Geomorphology has  
advanced greatly in the last 10 years to become a very interdisciplinary field Undergraduate students looking for term paper  
topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of  
a particular topic will find the answers they need in this broad reference work which has been designed and written to  
accommodate their diverse backgrounds and levels of understanding Editor in Chief Prof J F Shroder of the University of  
Nebraska at Omaha is past president of the QG G section of the Geological Society of America and present Trustee of the  
GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in  
the field A host of noted international geomorphologists have contributed state of the art chapters to the work Readers can  
be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the  
World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology  
that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of  
geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform
