Red Rising Wikipedia:

Wiki Anja Ebersbach, Markus Glaser, Richard Heigl, 2005-12-11 A book about wikis That's what people need Because with wiki technology lots of people can freely work together they can even generate very large works in the intellectual realm See for yourself Today we still marvel at our massive church buildings each constructed over a period of centuries requiring an immense amount of labor and often bearing the cultural stamp of all of the epochs during which it was created Someone just has to begin by placing stone upon stone and motivate the people nearby to help out a bit In places where such enthusiastic fellow men and women lend a hand and donate materials great things can emerge And where they are absent Either scant ruins remain or the iron will of a pharaoh is required an army of drivers the sweat of a people and a mountain of gold Great things can also be created in that way take the Pyramids a clear concept no blending of styles pure will Those are two very different paths The one entails passionate people devotedly building something together for the common good the other a single will manages a variety of resources to achieve a set goal Wikis are tools with which lots of people with a minimum of organization planning money and time can create something together and communicate with each other from several scattered computers or over the Internet
