Fundamentals of Statistical Inference, 1977 **Statistical and Inductive Inference by Minimum Message Length** C.S. Wallace, 2005-05-26 The Minimum Message Length MML Principle is an information theoretic approach to induction hypothesis testing model selection and statistical inference MML which provides a formal specification for the implementation of Occam's Razor asserts that the best explanation of observed data is the shortest Further an explanation is acceptable i.e. the induction is justified only if the explanation is shorter than the original data This book gives a sound introduction to the Minimum Message Length Principle and its applications provides the theoretical arguments for the adoption of the principle and shows the development of certain approximations that assist its practical application MML appears also to provide both a normative and a descriptive basis for inductive reasoning generally and scientific induction in particular The book describes this basis and aims to show its relevance to the Philosophy of Science **Statistical and Inductive Inference by Minimum Message Length** will be of special interest to graduate students and researchers in Machine Learning and Data Mining scientists and analysts in various disciplines wishing to make use of computer techniques for hypothesis discovery statisticians and econometricians interested in the underlying theory of their discipline and persons interested in the Philosophy of Science The book could also be used in a graduate level course in Machine Learning and Estimation and Model selection Econometrics and Data Mining C S Wallace was appointed Foundation Chair of Computer Science at Monash University in 1968 at the age of 35 where he worked until his death in 2004 He received an ACM Fellowship in 1995 and was appointed Professor Emeritus in 1996 Professor Wallace made numerous significant contributions to diverse areas of Computer Science such as Computer Architecture Simulation and Machine Learning His final research focused primarily on the Minimum Message Length Principle *Simultaneous Statistical Inference* Thorsten Dickhaus, 2014-01-23 This

monograph will provide an in depth mathematical treatment of modern multiple test procedures controlling the false discovery rate FDR and related error measures particularly addressing applications to fields such as genetics proteomics neuroscience and general biology The book will also include a detailed description how to implement these methods in practice Moreover new developments focusing on non standard assumptions are also included especially multiple tests for discrete data The book primarily addresses researchers and practitioners but will also be beneficial for graduate students
