SUPERINTELLIGENCE Nick Bostrom,2014   **Digital new deal: the quest for a natural law in a digital society** Riccardo Genghini,2021-06-08 The quest for a natural law that can be applied to a digital society may sound like an oxymoron but it is a necessary quest if we hope to institute a Digital New Deal Hence the title of this book Today once again mass media is disrupting society much as radio and cinema were used to buttress totalitarianism in the 1920s or even worse in the 15th century when the printing of the Bible unleashed 100 years of war plague and instability Things get messy when people disagree on facts rather than ideas Natural law springs from the features of the physical world which contains boundaries an inside and an outside limited resources living individuals objects living animals living plants climate the four elements etc None of this is a given in the digital world which looks today like feudalism in a box with fire walled communities run by unelected autocrats system administrators ruling over countless subjects whose identities are tied to the domain of the fire walled community and whose rights can only be enforced by the autocratic system administrator This
