Eric Freeman, Elisabeth Robson, 2011-10-06 HTML has been on a wild ride. Sure HTML started as a mere markup language but more recently HTML has put on some major muscle. Now we've got a language tuned for building web applications with Web storage, 2D drawing, offline support, sockets, and threads, and more. And to speak this language you've got to go beyond HTML5 markup and into the world of the DOM, events, and JavaScript APIs. Now you probably already know all about HTML markup, otherwise known as structure, and you know all about CSS style presentation, but what you've been missing is JavaScript behavior. If all you know about are structure and presentation, you can create some great-looking pages, but they're still just pages. When you add behavior with JavaScript, you can create an interactive experience, even better, you can create full-blown web applications. **Head First HTML5 Programming** is your ultimate tour guide to creating web applications with HTML5 and JavaScript, and we give you everything you need to know to build them, including how to add interactivity to your pages, how to communicate with the world of Web services, and how to use the great new APIs being developed for HTML5. Here are just some of the things you'll learn in **Head First HTML5 Programming**: Learn how to make your pages truly interactive by using the power of the DOM. Finally understand how JavaScript works and take yourself from novice to well-informed in just a few chapters. Learn how JavaScript APIs fit into the HTML5 ecosystem and how to use any API in your web pages. Use the Geolocation API to know where your users are. Bring out your inner artist with Canvas. HTML5's new 2D drawing surface. Go beyond just plugging a video into your pages and create custom video experiences. Learn the secret to grabbing five megabytes of storage in every user's browser. Improve your page's responsiveness and performance with Web workers. And much more.

Head First Learn to Code Eric Freeman, 2018-01-02 What will you learn from this book? It's no secret: the world around you is becoming more connected, more configurable, more programmable, more computational. You can remain a passive participant, or you can learn to code. With **Head First Learn to Code**, you'll learn how to think computationally and how to write code to make your computer, mobile device, or anything with a CPU do things for you. Using the Python programming language, you'll learn step by step the core concepts of programming, as well as many fundamental topics from computer science, such as data structures, storage, abstraction, recursion, and modularity. Why does this book look so different? Based on the latest research in cognitive science and learning theory, **Head First Learn to Code** uses a visually rich format to engage your mind rather than a text-heavy approach that puts you to sleep. Why waste your time struggling with new concepts? This multi-sensory learning experience is designed for the way your brain really works.

Head First Mobile Web Lyza Danger Gardner, Jason Grigsby, 2011-12-22 Mobile web usage is exploding. Soon more web browsing will take place on phones and tablets than PCs. Your business needs a mobile strategy, but where do you start? **Head First Mobile Web** shows how to use the web technology you're already familiar with to make sites and apps that work on any device of any size. Put your JavaScript, CSS, media query, and HTML5 skills to work, and then optimize your site to perform its best in the demanding mobile market. Along the way, you'll discover how to adapt your business strategy to target specific devices.

Navigate the increasingly complex mobile landscape Take both technical and strategic approaches to mobile web design Use the latest development techniques including Responsive Web Design and server side device detection with WURFL Learn quickly through images puzzles stories and quizzes We think your time is too valuable to waste struggling with new concepts Using the latest research in cognitive science and learning theory to craft a multi sensory learning experience Head First Mobile Web uses a visually rich format designed for the way your brain works not a text heavy approach that puts you to sleep
