students teachers and schools are somehow getting worse the record shows that critics have been issuing such warnings for more than 150 years It then examines four sets of data that speak to whether educational deterioration is taking place First data on educational attainment show a clear trend more students are getting more education Second standardized test scores suggest that American students are performing somewhat better certainly most test scores do not indicate that students are getting worse Third measures of popular knowledge also show evidence of improvement Fourth there is clear evidence that IQ scores have been rising In other words the best available evidence fails to support claims about a Stupidity Epidemic The essay then turns to exploring several reasons why belief in educational decline is so common and concludes by suggesting some more useful ways to think about educational problems The goal of this new unique Series is to offer readable teachable thinking frames on today s social problems and social issues by leading scholars all in short 60 page or shorter formats and available for view on <http://routledge.customgateway.com/routledge/socialissues.html> For instructors teaching a wide range of courses in the social sciences the Routledge Social Issues Collection now offers the best of both worlds originally written short texts that provide overviews to important social issues as well as teachable excerpts from larger works previously published by Routledge and other presses
