*Gemba Walks* James P. Womack, 2011-01-01 The life of lean is experiments All authority for any sensei flows from experiments on the gemba the place where work takes place not from dogmatic interpretations of sacred texts or the few degrees of separation from the founders of the movement In short lean is not a religion but a daily practice of conducting experiments and accumulating knowledge So writes Jim

s Metropolis 1927 Aldous Huxley s Brave New World 1931 and George Orwell s Nineteen Eighty Four 1949 In their visions the modern city provides a lifestyle full of comfort and convenience push button factories flyways that put an end to traffic jams electronically operated high speed trains and many other inventions that are a vital part of a goal oriented urban management to ensure maximal efficiency However Fritz Lang as well as Huxley and Orwell show that all the convenience and comfort is a high costs The urban habitat is depressing and in its design not aimed at recreation and personal development but at control of each individual This culminates in the erosion of any kind of individualism The life on the assembly line de individualizes the inhabitants equalizes and transforms them into machines that mechanically perform their work Moreover the people are no longer distinguishable they wear the same clothes and finally they are as the machines as which they work for In this light as a consequence of industrialization and the quest for maximal efficiency the trepidation emerges whether we are running into a state of deprivation oppression and terror Are we developing towards a Dystopia a state in which the condition of life is extremely depressing This is the starting point for a theory of optimal employment of resources of banishing waste a quest in pursuit of excellence without disregarding the focal point the individual In fact among successful managers there are no two identical strategies management models or packages of techniques To desperately cling to systems and self proclaimed panacea definitely is the wrong way as it is to call for an ideal rather than an effective manager As Fredmund Malik 2000 argues that the key to the achievements of effective managers is not their personality but their way

**Surviving the Future** David Fleming, Shaun Chamberlin, 2016-08-04 Surviving the Future is a story drawn from the fertile ground of the late David Fleming s extraordinary Lean Logic A Dictionary for the Future and How to Survive It That hardback consists of four hundred and four interlinked dictionary entries inviting readers to choose their own

path through its radical vision Recognizing that Lean Logic s sheer size and unusual structure can be daunting Fleming s long time collaborator Shaun Chamberlin has selected and edited one of these potential narratives to create *Surviving the Future* The content rare insights and uniquely enjoyable writing style remain Fleming s but are presented here at a more accessible paperback length and in conventional read it front to back format The subtitle *Culture Carnival and Capital in the Aftermath of the Market Economy* hints at Fleming s vision He believed that the market economy will not survive its inherent flaws beyond the early decades of this century and that its failure will bring great challenges but he did not dwell on this We know what we need to do We need to build the sequel to draw on inspiration which has lain dormant like the seed beneath the snow *Surviving the Future* lays out a compelling and powerfully different new economics for a post growth world One that relies not on taut competitiveness and eternally increasing productivity putting the grim into reality but on the play humor conversation and reciprocal obligations of a rich culture Building on a remarkable breadth of intellectual and cultural heritage from Keynes to Kumar Homer to Huxley Mumford to MacIntyre Scruton to Shiva Shakespeare to Schumacher Fleming describes a world in which as he says there will be time for music This is the world that many of us want to live in yet we are told it is idealistic and unrealistic With an evident mastery of both economic theory and historical precedent Fleming shows that it is not only desirable but actually the only system with a realistic claim to longevity With friendliness humor and charm *Surviving the Future* plucks this vision out of our daydreams and shows us how to make it real Step into the world of David Fleming you ll be so glad you did Rob Hopkins cofounder of the Transition Network
