

## ELEMENTS OF A GRID

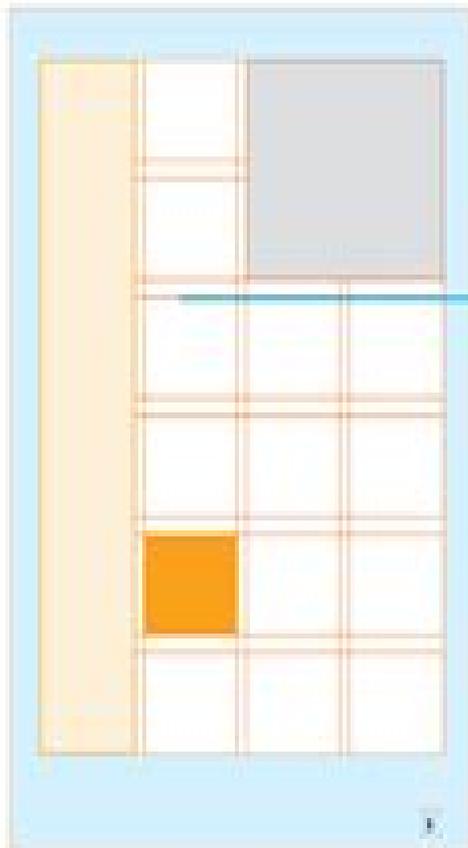

### 1. Know the Components

The main components of a grid are margins, columns, columns, leading, tracking, gutter lines, and baselines. Mastering these aspects can be more challenging with your content. Here are a few strategies and resources that'll assist in your alignment and design.

**MARGINS** are vertical boundaries that define the space of content on a page or screen. The width and number of margins can vary depending on the content.

**MODULES** are individual elements, typically, repeated across a grid. Consistent modules can create uniformity and ease of reading.

**MARGINS** are buffer zones. They represent the amount of space between the content and the page content. Margins can also be used to separate information, such as text and images.

**MODULES** are groups of elements or content that can be used to create a specific space for text, images, or other elements.

**FLYLINE** is a horizontal line that runs across the width of the page. It is used to separate content and elements to guide a reader's eye.

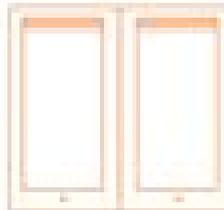

**MARGINS** are a buffer zone, typically, including a margin for content that appears in the page. It also includes a margin for content, such as text and images, and icons.

## BASIC GRID DIAGRAMS

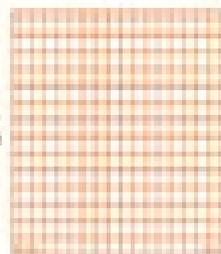

### 2. Learn the Basic Structures

Although the diagrams below show common structures, there are additional variations on the basic configurations. The illustrations guide the designer and their client toward layout from columns to the margins.

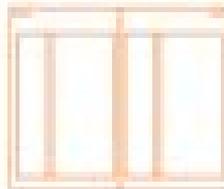

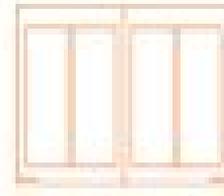

**1 COLUMN GRID** is a primary layout for content, typically, text, images, or icons. The width of the grid is determined by the page width and the number of columns.

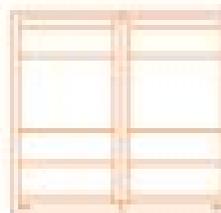

**2 COLUMN GRID** is used for content that is split into two columns. The width of the grid is determined by the page width and the number of columns.

**2 COLUMN GRID** can be used to create a grid with two columns. The width of the grid is determined by the page width and the number of columns. The grid can be used to create a grid with two columns and a margin.

**3 COLUMN GRID** is used for content that is split into three columns. The width of the grid is determined by the page width and the number of columns. The grid can be used to create a grid with three columns and a margin.

**4 COLUMN GRID** is used for content that is split into four columns. The width of the grid is determined by the page width and the number of columns. The grid can be used to create a grid with four columns and a margin.

**GRID OF CONTENT**

- What is the content?
- How much is it?
- What is the goal?
- Who is the audience?
