Advances in Mechanism and Machine Science Tadeusz Uhl, 2019-06-13 This book gathers the proceedings of the 15th IFToMM World Congress which was held in Krakow Poland from June 30 to July 4 2019 Having been organized every four years since 1965 the Congress represents the world's largest scientific event on mechanism and machine science MMS The contributions cover an extremely diverse range of topics including biomechanical engineering computational kinematics design methodologies dynamics of machinery multibody dynamics gearing and transmissions history of MMS linkage and mechanical controls robotics and mechatronics micro mechanisms reliability of machines and mechanisms rotor dynamics standardization of terminology sustainable energy systems transportation machinery tribology and vibration Selected by means of a rigorous international peer review process they highlight numerous exciting advances and ideas that will spur novel research directions and foster new multidisciplinary collaborations

Surgical Research in Implant Dentistry Michel M. Dard, 2023-10-24 This book explores in a comprehensive and systematic manner Surgical Research methodologies to the design and development of investigational studies in the field of implant based oral rehabilitation Such studies are linked in a chain binding in vitro in vivo ex vivo and digital evaluations An ambitious objective consists in exposing how investigators can generate and deliver knowledge by capturing synergy coming from preclinical and clinical trials Accordingly throughout the book translational aspects are closely scrutinized The opening chapters consider materials methods and procedures for preclinical and clinical studies in which approaches and models are extensively described The focus then moves to the process by which application of histology biomechanics biomarkers cellular molecular biology and imaging technologies lead to new results and consequently novel treatment concepts in implant dentistry implant borne prosthetic rehabilitations and the replacement or regeneration of tissues Finally the exciting opportunities afforded by the digital world are addressed This book shall be a valuable resource and time saving tool for a wide audience of researchers students practitioners and academics

Advanced Materials for Sustainable Energy and Engineering Elkhattabi El Mehdi, Mourad Boutahir, 2026-01-01 This book provides an in depth exploration of the latest advancements in the field of sustainable energy technologies In particular it focuses on recent progress made in renewable energy sources such as solar wind geothermal and more By closely examining emerging technological developments this book seeks to present innovative solutions that are driving the green revolution and contributing to global energy transition From improving energy efficiency in clinic operating theaters to investigating solar floor heating systems and utilizing deep learning for couscous grain drying each contribution offers unique insights such as numerical simulations of 3 D mixed convection the application of Big Data for greening agri food supply chains and the optimization of fluid flows using the LBM method Chapters also cover the design of tools for measuring total solar irradiance integrating photovoltaic thermal collectors for desalination refrigeration and dynamic analysis of power distribution systems This book also looks at into compound parabolic collectors for enhanced wood

drying lessons from solar energy plants and the physicochemical properties of sewage sludge for energy recovery It concludes with an exploration of an autonomous wind turbine s viability for supplying energy to a laboratory in Niger Featuring extended chapters selected as exceptional contributions to the 2023 International Conference on Advanced Materials for Sustainable Energy and Engineering in Meknes Morocco this book provides researchers and practitioners with a comprehensive overview of some of the latest advancements in novel nanomaterials With its interdisciplinary approach and rigorous scientific analysis this book serves as a valuable resource for those striving to develop sustainable energy solutions for the future

Current Perspectives and New Directions in Mechanics, Modelling and Design of Structural Systems Alphose Zingoni,2022-09-05 Current Perspectives and New Directions in Mechanics Modelling and Design of Structural Systems comprises 330 papers that were presented at the Eighth International Conference on Structural Engineering Mechanics and Computation SEMC 2022 Cape Town South Africa 5 7 September 2022 The topics featured may be clustered into six broad categories that span the themes of mechanics modelling and engineering design i mechanics of materials elasticity plasticity porous media fracture fatigue damage delamination viscosity creep shrinkage etc ii mechanics of structures dynamics vibration seismic response soil structure interaction fluid structure interaction response to blast and impact response to fire structural stability buckling collapse behaviour iii numerical modelling and experimental testing numerical methods simulation techniques multi scale modelling computational modelling laboratory testing field testing experimental measurements iv design in traditional engineering materials steel concrete steel concrete composite aluminium masonry timber v innovative concepts sustainable engineering and special structures nanostructures adaptive structures smart structures composite structures glass structures bio inspired structures shells membranes space structures lightweight structures etc vi the engineering process and life cycle considerations conceptualisation planning analysis design optimization construction assembly manufacture maintenance monitoring assessment repair strengthening retrofitting decommissioning Two versions of the papers are available full papers of length 6 pages are included in an e book while short papers of length 2 pages intended to be concise but self contained summaries of the full papers are in this printed book This work will be of interest to civil structural mechanical marine and aerospace engineers as well as planners and architects

Dental Ceramics Ulrich Lohbauer,Renan Belli,2022-07-01 This book is an evidence based update on recent most significant advances in dental ceramics specifically related to the relationships between composition microstructure and mechanical behavior Readers will find an introduction to the chemistry of dental ceramics as well as information about the technological progress and practical requirements restorative materials need to satisfy for long lasting structural integrity The book uses mechanistic approaches to address failure mechanisms from controlled experiments thus providing the tools for the application of sound research methodologies in the field It is targeted for researcher and dentists interested in the field of dental ceramic materials and fracture mechanics

Biodental Engineering V Jorge Belinha,R.M. Natal Jorge,J.C.

Reis Campos, Mário A.P. Vaz, João Manuel R.S. Tavares, 2019-02-13 Dentistry is a branch of medicine with its own particularities and very different fields of action and is generally regarded as an interdisciplinary field. The use of new technologies is currently the main driving force for the series of international conferences on Biodental Engineering. BIODENTAL BIODENTAL ENGINEERING V contains the full papers presented at the 5th International Conference on Biodental Engineering BIODENTAL 2018 Porto Portugal 22-23 June 2018. The conference had two workshops, one of them dealing with computational imaging combined with finite element method, the other dealing with bone tissue remodelling models. Additionally, the conference had three special sessions and sixty contributed presentations. The topics discussed in BIODENTAL ENGINEERING V include Aesthetics, Bioengineering, Biomaterials, Biomechanical disorders, Biomedical devices, Computational bio imaging and visualization, Computational methods, Dental medicine, Experimental mechanics, Signal processing and analysis, Implantology, Minimally invasive devices and techniques, Orthodontics, Prosthesis and orthosis, Simulation, Software development, Telemedicine, Tissue engineering, Virtual reality. The purpose of the series of BIODENTAL Conferences on Biodental Engineering, initiated in 2009, is to perpetuate knowledge on bioengineering applied to dentistry by promoting a comprehensive forum for discussion on recent advances in related fields in order to identify potential collaboration between researchers and end users from different sciences.

Safety and Reliability. Theory and Applications Marko Cepin, Radim Bris, 2017-06-14 Safety and Reliability Theory and Applications contains the contributions presented at the 27th European Safety and Reliability Conference ESREL 2017 Portorož Slovenia June 18-22 2017. The book covers a wide range of topics including Accident and Incident modelling, Economic Analysis in Risk Management, Foundational Issues in Risk Assessment and Management, Human Factors and Human Reliability, Maintenance Modeling and Applications, Mathematical Methods in Reliability and Safety, Prognostics and System Health Management, Resilience Engineering, Risk Assessment, Risk Management, Simulation for Safety and Reliability, Analysis, Structural Reliability, System Reliability and Uncertainty Analysis. Selected special sessions include contributions on the Marie Skłodowska-Curie innovative training network in structural safety, risk approaches in insurance and finance sectors, dynamic reliability and probabilistic safety assessment, Bayesian and statistical methods, reliability data and testing, organizational factors and safety culture, software reliability and safety, probabilistic methods applied to power systems, socio-technical economic systems, advanced safety assessment methodologies, extended Probabilistic Safety Assessment, reliability, availability, maintainability and safety in railways, theory, big data, risk analysis and management, and model-based reliability and safety engineering. Safety and Reliability Theory and Applications will be of interest to professionals and academics working in a wide range of industrial and governmental sectors including Aeronautics and Aerospace, Automotive Engineering, Civil Engineering, Electrical and Electronic Engineering, Energy Production and Distribution, Environmental Engineering, Information Technology and Telecommunications, Critical Infrastructures, Insurance and Finance, Manufacturing, Marine Industry.
