Mechanical Drawing Oswald Gueth, 1913 **The Production Sites of Architecture** Sophia Psarra, 2019-01-14 The Production Sites of Architecture examines the intimate link between material sites and meaning It explores questions such as how do spatial configurations produce meaning What are alternative modes of knowledge production How do these change our understanding of architectural knowledge Featuring essays from an international range of scholars the book accepts that everything about the production of architecture has social significance It focuses on two areas firstly relationships of spatial configuration form order and classification secondly the interaction of architecture and these notions with other areas of knowledge such as literature inscriptions interpretations and theories of classification ordering and invention Moving beyond perspectives which divide architecture into either an aesthetic or practical art the authors show how buildings are informed by intersections between site and content space and idea thought and materiality architecture and imagination Presenting illustrated case studies of works by architects and artists including Amale Andraos Dan Wood OMA Koen Deprez and John Soane The Production Sites of Architecture makes a major contribution to our understanding of architectural theory

1923-50 Richard Joseph Neutra, 1964 **Piping Systems, Drafting and Design** Louis Gary Lamit, 1981 **Buildings and Projects: [1923-50]** Richard Joseph Neutra, 1951 Fairplay, 1971 **Between Landscape Architecture and Land Art** Udo Weilacher, 1999 Contemporary landscape architecture is progressing towards an appropriate and independent language of its own Drawing on the potentials of art and architecture the ever changing relationship between man and nature is given new expression Ecological concerns and aesthetic aspirations interact in a fruitful dialogue Particularly Land Art and related art movements become sources of inspiration and innovation The ground breaking works of the landscape artists and architects presented in this book reveal the diverse current trends in international landscape design This book offers many stimuli to design Its contents are not just for landscape architects wrote The architects journal With chapters on Dani Karavan Ian Hamilton Finlay Bernard Lassus Peter Latz Dieter Kienast Herman Prigann Peter Walker Adriaan Geuze and others *Finishing in Architecture* Paul Emmons, Marcia Feuerstein, Negar Goljan, 2025-06-30 Finishing in Architecture Polishing Completing Ending explores the topic of finishing and the fascinating physical and metaphysical implications of its various conceptions in architecture Finishing is essential to all human practices and concepts of time yet simultaneously it is largely impossible to identify an entirely finished state of being As mortals we organize our worlds into beginnings and endings starts and finishes Architecture s temporality however may contain something of both the mortal and immortal within it a desire for permanence combined with lamentation over its impossibility While many approaches to finishing construct two opposed ontological conditions the finished and the unfinished this dualistic ploy neglects the complexity of

architectural practice cultural reception and historiographic shifts in semiotics during the lifetime of a building More nuanced approaches are examined in this collection of 38 essays and creative works from a diverse group of scholars architects and artists who conceptualize finishing not simply as a final outcome but as an extended action a mood that presumes an end is near all the while working continuously toward but never achieving completion It is here that the concept of finishing is not a state of being but a state of becoming as an active thickening of time when the end is thought to be imminent but not yet attained Finishing more than a final endpoint is a void state that is extended through efforts framing its territory while never quite containing it From the material to the procedural and the conceptual this volume explores the practices of finishing in architecture within three currents surfaces projects and most broadly architectural times It will be of interest to students and instructors of architecture and design architectural historians and other scholars
