Making Every Primary Lesson Count is for new and experienced teachers alike. It does not pretend to be a magic bullet. It does not claim to have all the answers. Rather, the aim of the book is to provide effective strategies to bring the six principles to life with each chapter introduced by two fictional scenarios rooted in situations primary teachers typically encounter and concluding in a series of questions to inspire reflective thought and help you relate the content to your own practice. In an age of educational quick fixes and ever moving goalposts, this precise and insightful addition to the Making Every Lesson Count series will have a high impact on learning in the classroom, enabling pupils to leave primary school as confident, successful learners equipped with the skills and knowledge required of them. Suitable for all Early Years and primary teachers.
