Toward Zero-defect Programming Allan M. Stavelly,1999 Toward Zero Defect Programming describes current methods for writing nearly bug free programs These methods are based on practices developed at IBM and elsewhere under the name Cleanroom Software Engineering The successful application of these methods in commercial projects over the past fifteen years has produced defect rates that are at least an order of magnitude lower than industry averages Remarkably this reduction in defects comes at no net cost on the contrary it is often accompanied by increased productivity and shorter overall development time In a concise and well illustrated presentation Stavelly shows how these methods can be applied in three key areas of software development 1 specification 2 verification and 3 testing
