**Language Classrooms** Handoyo Puji Widodo, Alistair Wood, Deepti Gupta, 2017-06-14 The teaching of English in the Asian context is always challenging and dynamic because both teachers and learners have diverse linguistic and cultural backgrounds. Equally important where English is not widely used outside the classroom, English language classrooms are an authentic site of learner engagement. For these reasons, for all those concerned with contemporary English language teaching, ELT in Asia: Asian English Language Classrooms Where Theory and Practice Meet provides an account of theoretical orientations and practices in the teaching of English to multilingual speakers whose primary language is not English. While covering the fundamental ELT areas, e.g. the teaching of language skills, educational literature, the use of technology in ELT, the role of pragmatics in ELT, social psychology of the language classroom, and language classroom management, with which every language teacher and teacher trainer must be concerned, this volume showcases how particular orientations shape ELT practices. We believe that practicing English teachers must have a heightened awareness of the theory behind their practice. At the same time, the theoretical stance must be firmly anchored in actual classrooms. Containing newly commissioned chapters written by well-regarded and emerging scholars, this book will appeal not only to beginning teachers or teachers in training but also to established teachers around Asia where English is used as a lingua franca. If you are a student teacher of English or an English teacher who would like to see what other progressive teachers like you are doing across Asia, this is the book you have been looking for. *The Athenaeum*, 1909

**REFRAMING ENGLISH EDUCATION IN ASIA** Evelyn Doman, 2015-02-16 English language teaching (ELT) has changed dramatically over the past decade in Asia, an area of the world where English is taught as a foreign language rather than a second language. A drastic movement has been made from the traditional Grammar Translation Method to more communicative approaches to teaching and learning, such as project-based and task-based learning. In this book, the authors outline the development of ELT in Asia in the past decade in the wider context of educational reform in the region, which puts greater value on the acquisition of English and in student-centered classrooms. Given the growing importance of English and the enormous energy and enthusiasm in the region for learning the language in both formal and informal contexts, ELT will continue to flourish. University and secondary school teachers and researchers from five different Asian countries share methodologies and innovative programs that they have

found to be successful in their classrooms including ideas for technology enhanced language learning This volume offers insight into the daily academic lives of secondary and university English language classrooms across the region and shows how English is currently being reframed in this vibrant region *British Medical Journal* ,1919 **British Books** ,1910
